## Contents: Volume 11

**JANUARY**

Rapid Determination of Lead in Urine by Ion Exchange  
*Donald T. Forman and James E. Garvin*  1

Micromethod for the Estimation of Plasma Fibrinogen  
*Robert G. Martin and Roland E. Berry*  10

Evaluation of a Photoelectric Clot Timer for the Performance of Prothrombin Times  
*Seymour Winsten*  17

Adaptation of Babson's Method for the Determination of Serum Glutamic Oxaloacetic Transaminase in the Clinical Laboratory  
*Masaki Furuno and Albert Sheena*  23

The Basis for Elevation of Serum Glutamic Pyruvic Transaminase Levels in Serum Stored on Clots  
*W. B. Elliott and Harold Rosamilia*  29

A Simple, Rapid Method for Paper Chromatography of Barbiturates  
*William J. Waddell*  37

A Rapid Modification of the Cephalin Cholesterol Flocculation Test  
*Arthur A. Rosenberg, Lucille G. Eimann, and John O'Leary*  40

Air-Cooled Extractors and Their Use in Determination of Cholesterol  
*Frederic E. Holmes*  44

New Method for Determination of Alkylating Agents in Biologic Fluids  
*Yulin L. Tan and Donald R. Cole*  58

An Evaluation of Technics for the Separation and Estimation of Plasma Fibrinogen  
*Jesse F. Goodwin*  63

Use of a Screening Procedure for Blood Urea Nitrogen  
*R. D. McNair*  74

Vacuum Manifold for Use of Erythrocyte Uptake of T3 Technic  
*E. H. Cranwic, D. Allen, T. B. Cooper, and T. Piti*  77

The Clinical Chemist  
*John G. Reinhold*  84

**FEBRUARY: PART 1**

A Micro Method for Serum Cholinesterase  
*Phil J. Garry and Joseph I. Routh*  91

A Saccharogenic Method for Estimating Electrophoretic and Chromatographic Distribution of Human Serum Amylase  
*Ichiro Ujihira, Ronald L. Searcy, J. Edward Berk, and Shinichiro Hayashi*  97

Determination of Urea in Blood and Urine with Diacetyl Monoxime-Glucuronolactone Reagent  
*Teutomi Momose, Yosuke Ohkura, and Jun Tomita*  113

Automated Fluorometric Method for Determination of Serum Calcium  
*John B. Hill*  122

Electrophoresis of Glutamic Oxaloacetic Transaminase in Serum, Beef Heart, and Liver Homogenates on Cellulose Acetate  
*William C. Romel and S. Joseph Lanmanusa*  131

Simultaneous Determination of Barbiturates and Salicylates by Ultraviolet Spectrophotometry  
*Solveig Bjerre and C. J. Porter*  137

Centrifuging, Storing, and Quantitative Dispensing of Micro Samples; An Improved Technic  
*Eva Wittgenstein and Kenneth W. Rowe, Jr.*  155

Book Reviews

FEBRUARY: PART 2—SPECIAL SUPPLEMENT ISSUE

Papers Presented as Part of the Symposia Program of the Fifth International Congress on Clinical Chemistry

Preface Harold D. Appleton 163
Introductory Remarks Oliver H. Gaebler 165
President's Report Monroe E. Freeman 166

Lipid Metabolism
Metabolism and Function of Phospholipids and Sphingolipids R. J. Rossiter 171
Prof. E. J. King Memorial Symposium on Enzymes in Clinical Chemistry
Prof. E. J. King Eulogy C. P. Stewart 194
Recent Advances in Electron Transfer and Oxidative Phosphorylation Youssef Hatef 198
Hormonal Regulation of Enzyme Activity
K. L. Lemon Yielding, Gordon M. Tomkins, and Mark W. Bitinsky 213
Enzyme Action in Living Cells Benno Hess and Karl Brand 223
The Clinical Application of Enzyme Activity Measurements in Body Fluids with Special Reference to Current Problems J. H. Wilkinson 239
Discussion of the Symposium on Enzymes in Clinical Chemistry Keith S. Henley 247

Physical Methods in Clinical Chemistry
The Analysis of Biological Materials by Atomic-absorption Spectroscopy J. B. Willis 251
Affinity of Organic Compounds for Free Electrons with Thermal Energies Albert Zlatkis and J. E. Lovelock 259
Polarographic Reactions of Plasma Proteins and Their Clinical Significance Otto H. Müller 270
Recent Developments in X-Ray Spectrometry as Applied to Clinical Chemistry Samuel Natelson 290

Metabolism
Disorders of Bilirubin Metabolism: The Warner-Chilcott Lecture G. H. Lathe 309
Changes in Liver Metabolism Induced by the Poisons of Amanita Phalloides Otto Wieland 323
Metabolism of Glycoproteins Richard J. Winzler 339
Standardization of Nomenclature in Clinical Chemistry: Report of a panel discussion Alan Mather 348

Fifth International Congress on Clinical Chemistry, 1963
Commission and Committees 354
Members 355

MARCH

Enzymatic Determination of Glucose in Urine by Automation Following Rapid Removal of Inhibitors by Ion-Exchange Resin J. E. Logan and D. E. Haight 367
Determination of Microgram Quantities of Inorganic Boron in Mammalian Specimens T. Komkowski and Lee E. Farr 378
Analog Computation of Electrophoraxis Patterns Lawrence A. Lotito, Donald K. McKay, and David Seligson 386
Porphyrins and Chlorins from a Congenital Porphyrnia Patient T. C. Chu and Edith Ju-Hwa Chu 395
Improved Instrumentation for the Determination of Prothrombin Activity Rex E. Sterling, Alan A. Wilcox, Arnold G. Ware, and Mary K. Umehara 409
Coulometric Determination of Protein Nitrogen: Application to direct titration of Kjeldahl digests

Gary D. Christian, Edward C. Knoblock, and William C. Purdy 413

Method for Tissue Hemoglobin Analysis

Daniel Andersen and William C. Shoemaker 422

Comparison of a Colorimetric (Automated) with an Enzymatic (Manual) Uric Acid Procedure John B. O'Sullivan, John O'S. Francis, and Nathan Kantor 427

Identification of Barbiturates in Blood by Paper Chromatography

Eugene Fastlich, Bernard Searle, and Bernard Davidow 436

Evaluation of a Dye-binding Method for Determination of Serum Albumin

Robert G. Martinek 441

Book Reviews 448

The Clinical Chemist 450

APRIL

Microdetermination of Proline in Serum G. K. Summer and N. O. Roszel 455

Polarographic Determination of Traces of Gold in Blood and Serum

Gary D. Christian 459

Estimation of Urinary 5-Hydroxyindoleacetic Acid by Paper Chromatography—A Sensitive Method Helen K. Berry and Indira Krupanidhi 465

An Enzymatic Method for Glucose Quantitation in Normal Urine Daniel M. Keller 471

Direct Spectrophotometric Determination of Albumin in Human Serum

F. Lee Rodkey 478

Separation and Determination of the Total Globulins of Human Serum

F. Lee Rodkey 488

Evaluation of a Modification of the Zak-Kiliian Reaction for Determination of Serum Cholesterol

Robert G. Martinek 495

Measurement of Serum Glutamic Oxalacetic Transaminase

Andrew C. Peacock, L. Thomas Byrd, and A. Hope Sule 505

Closed-System Apparatus for Aeration-Diffusion: Application to Determination of Blood Ammonia

Frederic E. Holmes 512

A New Indicator for the Chelometric Measurement of Calcium in Serum and Urine

Gloria Catledge and Homer G. Biggs 521

Immunoglobulin Components of “Gamma” Globulin in Human Serum

Virginia E. Trevorrow, Deborah Merrill, and Henry N. Claman 527

Scientific Notes

Reliability of Hemoglobin Values Obtained with Ferricyanide-Cyanide Reagents Subjected to Freezing Temperatures

Eugene W. Rice and Cynthia Z. Lapara 531

An Improved Colorimetric Transaminase Assay

Arthur L. Babson and George E. Phillips 533

Book Reviews 535

The Clinical Chemist 538

MAY

An Automated Procedure for Blood Phenylalanine

John B. Hill, George K. Summer, Murray W. Pender, and Norris O. Roszel 541

Serum Bile Acids in Patients with Liver Disease

Samuel J. Levin and Morton K. Schwartz 547

Relative Rates of Color Development of 17-Keto- and Ketogenic Steroids in the Zimmerman Reaction

John H. C. Liu 554

A Simple and Rapid Method for Estimating 3,4-Dihydroxyphenethyamine (Dopamine), 3,4-Dihydroxyphenylalanine (Dopa), and Homovanillic Acid (HVA) with “Two-Solutions Paper Electrophoresis”

F. Eichhorn and A. Rutenberg 563
On the Nature of the Inhibitor of Urinary Alkaline Phosphatase
Stephen D. Hilliard, James F. O'Donnell, and Steven Schenker 570
A Pituitary Gonadotropin Assay Based on Absorption by Attapulgite
William B. Watson and R. William Knouse 575
Quantitation of Serum Hemoglobin-Binding Capacity Using Cellulose Acetate
Membrane Electrophoresis C. R. Valeri, J. C. Bond, K. Fowler, and J. Sobucki 581
A Method for the Rapid Hydrolysis of Urinary Glaucuronoside Metabolites of
Testosterone John R. Kent, Allen B. Rawitch, and Frederick Peacock 589
Data Processing in Clinical Chemistry Andrew C. Peacock, Sylvia L. Bunting,
Donna Brewer, Ernest Colloce, and George Z. Williams 595
Book Reviews 612
The Clinical Chemist 613

JUNE

The Determination of Thiamine in Small Amounts of Whole Blood and Serum by
A Simplified Thiochrome Method Than Myint and Iraold B. House 617
Automated and Manual Direct Methods for the Determination of Blood Urea
Walton H. Marsh, Benjamin Fingerhut, and Henry Miller 624
Simplified Preparation of Blood Hemolysates for Hemoglobin Electrophoresis
R. Quentin Blackwell and Jeannette Tung-Hsiang Huang 628
Operation of the Technicon Flame Photometer with Natural Gas: Use in the de-
termination of serum lithium and the semi-micro analysis of serum sodium and
potassium Donald B. Nevius and Gerard F. Lanchantin 633
Automated Determination of Serum Iron Bennie Zak and Emanuel Epstein 641
Procedure for Detecting Atypical Serum Cholinesterase Using o-Nitrophenylbu-
tyrate as Substrate R. B. McComb, R. V. LaMotta, and H. J. Weistone 645
The Clinical Stability of Serum Cholinesterase Activity
Howard J. Weistone and Rudolph V. LaMotta 653
Scientific Notes:
An Automated Method for Urine Creatinine Which Does Not Require a Dia-
lyzer Module Samuel Pino, Joseph Benotti, and Henry Gardyna 664
Book Reviews 667
The Clinical Chemist 669

JULY

Purification and Analysis of Bilirubin John T. Clarke 681
Use of Bilirubin Standards Samuel Meites and John W. Trauberi 691
A Coulometric Determination of Urea Nitrogen in Blood and Urine
Gary D. Christian, Edward C. Knoblock, and William C. Purdy 700
An Improved Method for the Determination of Guanase in Serum or Plasma
Allen C. Hae and Alfred H. Free 708
Determination of Serum Calcium by Means of Sodium Alizarinsulfonate
Harold V. Connerity and Angus R. Briggs 716
Stability of Cholinesterase in Frozen Plasma D. G. Johnston and W. C. Huff 729
The Clinical Chemist
Scientific Program: 17th National Meeting of the American Association of
Clinical Chemists 733

AUGUST

Determination of Free Fatty Acids in Plasma by a Colorimetric Procedure: An
Appraisal of the Method and Comparison with Other Techniques
Harold B. Anstall and Jose M. Trujillo 741
An Automated Fluorometric Method for Determination of Lactic Dehydrogenase in Serum

Lewis Brooks and Harry G. Olken

748

"True" Creatinine Chromogen Determination in Serum and Urine by Semi-automated Analysis

E. Polar and J. Metcoff

763

Separation of Erythrocytes of Different Ages

Daniel J. O'Connell, Carmine J. Caruso, and Martin D. Sass

771

Scientific Notes

Serum Phenylalanine Levels in Phenylpyruvic Oligophrenia

Guy Nadeau and Benoit Fortin

782

Book Reviews

Abstracts of Papers from Scientific Sessions: 17th National Meeting of the American Association of Clinical Chemists

786

The Clinical Chemist

832

SEPTEMBER

Determination of Homogentisic Acid in Urine

Ramon E. Stoner and Ben B. Blinaiss

833

Determination of Glucose in Biologie Fluids with an Automated Enzymatic Procedure

Michael Robin and Abraham Saifer

840

Comparison of Two Current Colorimetric Procedures for Determination of Serum Glutamic Oxaloacetic Transaminase

R. M. Nakamura, R. Magsaysay, and G. M. Kunitake

846

Determination of Calcium in Urine by the Chloranilate Method

William W. Webster and William H. Kern

855

A Rapid Saccharogenic Method for the Determination of Serum Amylase

Benjamin Fingerhut, Rocco Ferzola, Alfred Poock, and Walton H. Marsh

862

A New Method for the Continuous Monitoring of Blood Glucose by Measurement of Dissolved Oxygen

Arnold Henry Kadish and David A. Hall

869

An Automated p-Nitrophenylphosphate Serum Alkaline Phosphatase Procedure for the AutoAnalyzer

Stanley Morgenstern, Gerald Kessler, Joseph Auerbach, Richard V. Flor, and Bernard Klein

876

An Automated p-Nitrophenylphosphate Serum Alkaline Phosphatase Procedure for the "Robot Chemist"

Stanley Morgenstern, Gerald Kessler, Joseph Auerbach, Richard V. Flor, and Bernard Klein

889

Book Reviews

898

The Clinical Chemist

899

OCTOBER

Determination of 3-Methoxy-4-Hydroxymandelic Acid (VMA) in Urine by Thin-Layer Chromatography

J. S. Annino, M. Lipson, and L. A. Williams

905

Phenothiazine Derivatives in Urine: "False Negative Results" With the Forrest Color Test (FPN), and a Method for Their Elimination

K. N. Campbell

914

Serum Glycoproteins and Proteins after Fractures

M. Hertzberg, Z. Oberman, S. L. Weissman, and H. Z. Herold

920

A New Method for the Determination of Nitrofurantoin in Urine

John D. Conklin and Richard D. Hollifield

925

Determination of Total Iodine in Urine, Stool, Diets, and Tissue

Joseph Benotti, Norbert Benotti, Samuel Pino, and Henry Gardyna

932

Evaluation of a Cellulose-Acetate Electrophoresis System for Serum Protein Fractionation

Alex Kaplan and John Savory

937

Stabilization and Preservation of Serum Prostatic Acid Phosphatase Activity

Richard P. Doe, George T. Mellinger, and Ulysses S. Seal

943
Fluorometric Measurement of Creatine Kinase Activity
Sylvan M. Sax and John J. Moore 951

An Automated Technic for the Assessment of Thyroid Status, Based upon the Binding of $^{131}$-Triiodothyronine by Serum
A. C. Pollard, E. S. Garnett, and C. Webber 959

Scientific Notes
Simultaneous Determination of Sodium, Potassium, Chloride, Urea Nitrogen, and Glucose from Capillary Blood
Morris London and Jesse H. Marymont, Jr. 968

Book Reviews
970
The Clinical Chemist 971

NOVEMBER

A Rapid Micro Method for Determination of Ascorbic Acid in Urine by Ferric Reduction
Leon S. Vann 979

An Automated Trihydroxyindole Procedure for the Differential Analysis of Catecholamines
Robert L. Robinson and Daniel T. Watts 986

Automated Determination of Acid Phosphatase
Bernard Klein, Joseph Auerbach, and Stanley Morgenstern 998

Evaluation of Hydrolytic Products of 17-Ketosteroids by Means of Gas-Liquid Chromatography
L. P. Cawley, B. O. Musser, W. Faucette, S. Beckloff, and H. Learned 1009

The Effect of Methenamine Mandelate (Mandelamint) on Determination of Urinary Estriol
Joseph C. Touchstone, Maria Stoikewycz, and Kaighn Smith 1019

Evaluation of Gas-Liquid Chromatography in Assays for Blood Volatiles
Alan Mather and Angel Assimos 1023

Scientific Notes
A Chart for Concentrational Calculations in Quality Control
Ralph E. Thiers and Robert R. Cole 1036

Blood Volume Error Detector
Joseph H. Boutwell, Jr., and George H. Stewart 1040

The Clinical Chemist 1042

DECEMBER

An Automated Method for the Determination of Sulfonamides in Plasma
H. B. Falk and R. G. Kelly 1045

A Direct-Reading Bilirubinometer Incorporating Hemolysis and Turbidity Correction
Sanford H. Jackson 1051

Electrophoretic Fractionation of Serum Glycoproteins on Cellulose Acetate
R. L. Kelsey, T. P. deGraffenried, and R. C. Donaldson 1058

A Simple Method for the Quantitative Determination of N-Acetyl-p-Aminophenol (APAP) in Urine
Richard M. Welch and A. H. Conney 1064

Scientific Notes
Simple Method for Concentration of Cerebrospinal Fluid for Protein Electrophoresis
Stanley Burrows 1068

Books Received
1070
The Clinical Chemist 1071

Index 1089
