

New
J.T.Baker
 catalog
 lists
330
 products
 for the
 clinical
 laboratory

J. T. Baker now offers all the reagents necessary to formulate all Technicon® AutoAnalyzer® solutions. These reagents are "use-tested" and guaranteed suitable for AutoAnalyzer application. Included are:

DPN
HABA Dye
INT Dye
Diaphorase
Fast Red PDC Salt

For application and product information on these products for AutoAnalyzer use and more than 5,000 other chemicals, see our new Catalog 700 . . . the most complete guide to materials for critical laboratory applications.

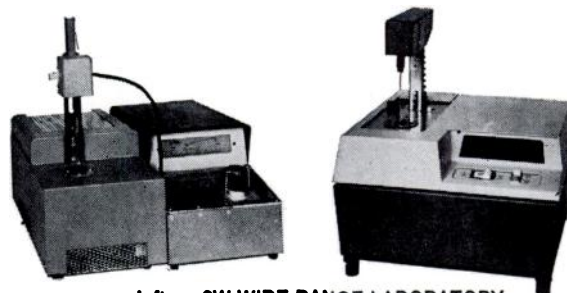

For the products he needs and uses most often . . . the professional chooses J. T. Baker.

ELKAY "FIBRIN" CUPS

**For use in automated
Prothrombin time and
coagulation studies**

ElKay Fibrin Cups are designed to fit the most popular automated Prothrombin Time equipment. Manufactured of the finest quality high density linear polyethylene to assure heat transfer uniformly across the cup from the temperature block to the reagents used. Write-on flange provides convenient identification area. Fibrin Cups are of standard volume capacity. Careful quality control assures cleanliness upon arrival.

AVOID STORAGE PROBLEMS. We will store your yearly needs and ship your requirements on a monthly basis. No order is too large or too small.

- **Immediate delivery • Any quantity**
- **Order years supply for lowest prices**
(We'll stock it for you.)
