PHOSPHAZYME® SET

The first complete Phosphatase set which measures all 3 types of Phosphatase... Alkaline, Acid and Prostatic Acid Phosphatases, from ONE substrate and ONE standard curve. Sodium phenylphosphate in a unique, tiny tablet called Fastab® substrate; substrate dissolves readily (one per test) with no wasted reagent. Studies show that sodium phenylphosphate measures activity of all phosphatases, regardless of origin. (Alkaline Phosphatase reagents available in economical, larger sizes.)

®PHOSPHAZYME—Trademark of Harleco
®FASTAB—Trademark of Harleco

The set combines economy of time and money with accuracy. Because the final color reaction measures liberated Phenol, an inorganic phosphate test is not necessary.
