The Du Pont ACA can run one CPK. Automatically. At any time.

And dozens of BUNs, LDHs, GOTs and GLUCs. In any sequence.

Unlike mass-screening and fixed-profile automation, the Du Pont Automatic Clinical Analyzer (aca) performs discrete analyses with random selectivity.

It is request-oriented—does only the tests you want it to do and according to your priorities. Any sequence of tests can be run on any sample, at any time. Even single “stat” requests can be easily introduced at any time, with positive identification.

For the complete aca story, write: Du Pont Company, Room 22749, Wilmington, DE 19898.
