AMERICAN ASSOCIATION OF CLINICAL CHEMISTS

. . . It is the aim and object of this Association to raise the level at which chemistry is practiced in the clinical laboratory; to stimulate the development of new chemical methods . . . ; to encourage highly trained chemists to enter the field . . . ; to encourage those engaged in the field to pursue advanced studies . . . ; and to create and maintain a forum where chemists engaged in applying the science of clinical chemistry may exchange ideas and information . . . —From Article II, Revised Constitution.

OFFICERS

President: Dr. Ralph E. Thiers
Van Nuys, Calif.

President-Elect: Dr. George N. Bowers, Jr.
Hartford, Conn.

Secretary: Dr. Royden N. Rand

CLINICAL MICROBIOLOGY
by Donna J. Blazevic M.P.H.
a new manual published by ASMT

The American Society for Medical Technology's newest publication, CLINICAL MICROBIOLOGY, is the fourth manual in the Self Assessment Series. This manual is divided into 12 sections with questions on: Collection and Handling of Specimens, Isolation Procedures; Biochemical Reactions; Quality Control; Identification of Organisms; Anaerobic Bacteria; Unusual & Fastidious Organisms; Disease Association; Antibiotic Susceptibility Testing; Mycobacteria; Mycoplasmas; Mycology; and Parasitology.

ASMT is pleased to be able to offer this manual to members at a reduced cost due to a grant-in-aid from BioQuest, Division of Becton, Dickinson & Company. Prices for each or all items in this packet are:

While we may not be able to tell you exactly how your experiments are going to turn out, we can promise you this: with S&S Selecta Products, our part of your experiment is controlled.

Selecta TLC Silica Gel—Acid Fast with or without 3% zinc sulfide fluorescent indicator on 20x20 cm glass or Mylar® foils for drug screening tests in toxicology labs.

Selecta TLC Micropolyamide Foils coated on both sides for Dansyl and other amino acid studies. 15 x 15 cm foils, rapid, possibility of repeated use.

Other Selecta Products:
- TLC cellulose powders double acid washed, crystalline acetylated powders at 6, 21 or 45%. Absolute, pure cellulose.
- TLC silica gel powders with or without luminescant indicator.
- TLC glass ready-plates of cellulose, acetylated, union, option, PEI types, polyamide, micropolyamide, polyamide-acetylated. Specialized packaged to prevent wicking.
- TLC Mylar ready-foils of cellulose, silica gel acid, polyamide with and without fluorescent material and adhesive.

NOW YOU HAVE THE BECKMAN NEW DIMENSION SERIES OF AUDIO-VISUAL TECHNICAL PROGRAMS AVAILABLE FOR YOUR OWN LAB, PLANT, OR CLASSROOM...THE SAME PROFESSIONALLY ACCLAIMED COURSES OFFERED NATIONWIDE IN BECKMAN TRAINING CENTERS.

Each program, in a special album, consists of printed script, set of 35mm slides, and tape cassettes automatically keyed to the slides.

Courses listed below range from basic material to advanced instruction. For prices and full information, call or write to Beckman Technical Education Center, 2500 Harbor Blvd., Fullerton, Calif. 92634.

Enzymatic Analysis • Instrumental Method in Cell Biology • Liquid Scintillation Counting • Electrochemical Measurements • Physiological Measurements • UV-Visible Spectroscopy • Infrared Techniques • Radioimmunoassay • Gas Chromatography • Electrophoresis • Electroencephalography.
And many more.

BUY OUR EDUCATIONAL PROGRAMS.
The DuPont aCA can run one CPK. Automatically. At any time.

And dozens of BUNs, LDHs, GOTs and GLUCs. In any sequence.

Unlike mass-screening and fixed-profile automation, the DuPont Automatic Clinical Analyzer (aCA) performs discrete analyses with random selectivity.

It is request-oriented—does only the tests you want it to do and according to your priorities. Any sequence of tests can be run on any sample, at any time. Even single “stat” requests can be easily introduced at any time, with positive identification.

For the complete aCA story, write: Du Pont Company, Room 22749, Wilmington, DE 19898.

TURNER INSTAFILL

ROUND OUT YOUR SPECTROPHOTOMETER

If your spectrophotometer is one of the three most popular moderately priced brands, then here's a new accessory that will vastly improve efficiency, reliability, and precision of reading multiple samples.

The TURNER Instafill combines a temperature controllable microcell with a push-button operated unit that fills and empties it. With only 0.6 ml sample, Instafill reduces reagent costs, operates without bubble problems, and exhibits negligible carryover.

Send for full information. Write G. K. TURNER ASSOCIATES, 2524 Pulgas Ave., Palo Alto, CA 94303.

Our new flame photometer does Calcium as easily as Na, K and Li.

Now instead of wet chemical methods — determine serum calcium faster and more efficiently by flame.

The name of this amazing new instrument? The Coleman Model 51Ca. A fast, stable flame photometer that not only does quantitative analysis of sodium, potassium and lithium in serum or urine, but also does serum calcium.

Its analysis of calcium compares very favorably with the NBS atomic absorption referee method. Reproducibility is within 0.1 mg/l. A single 1:100 dilution of 20 μl of serum provides enough sample for Na, K, Li and Ca analysis. Groups of 18 samples each may be determined without restandardization.

Own the original Model 51? A conversion kit for calcium is available. Contact your Coleman dealer. Or write Coleman Instruments Division, Perkin-Elmer Corp., 2000 York Road, Oak Brook, Ill. 60521.

Radioimmunoassay Test Sets

Three complete sets — Available exclusively from Wien Laboratories

Each set contains all reagents and antibodies needed for complete serum value determinations. And these sets are uniquely designed to assure you of more accurate results with less complicated procedures.

1. Aldosterone Test Set
   requires paper chromatography purification

2. Estradiol-Estrone Test Set
   requires column chromatography separation

3. Circulating T₃-I¹²₅ Test Set
   a direct serum assay (no extraction) with a simple, 4-hour procedure
   • greatly simplified assay techniques
   • highly specific antibodies
   • same-day results
   • linear calibration curves
   • all solutions pre-mixed, ready-to-use
