One day, quite by accident, Jack was promoted to a higher position.

And Jack's company lost a very good man.

Highway accidents like the one Jack had take the lives of over 28,000 employees every year. It's a terrible waste. And one that you could be doing something about.

The National Safety Council will help your company set up its own Defensive Driving Course, just as it has for companies like General Telephone and National Cash Register.

And the Defensive Driving Course can help your company reduce the number of lives lost in traffic accidents, just as it did for those companies.

So send for our survival course. Maybe you'll save some of your employees on the way up from an early ascension.
