299 Use of Polyethylene Glycol in Separating Bound from Unbound Ligand in Radioimmunoassay of Thyroxine
Marian C. Cheung and W. Roy Slaw white, Jr.
305 Changes in Electrophoretic Mobilities of α- and β-Lipoproteins as a Result of Plasma Dellepidation
Bill E. Cham and Brian R. Knowles
310 Simultaneous Quantitation of 4-Hydroxy-3-Methoxymandelic (Vanilmandelic) and 4-Hydroxy-3-Methoxyphenylacetic (Homovanillic) Acids in Human Urine
Somasundaram Addanki, Elmer R. Hinnenkamp, and Juan F. Sotos
315 Determination of Apolipoprotein A and Its Constitutive A-I and A-II Polypeptides by Separate Radioimmunoassays
Michael D. Curry, Peter Alasupovic, and C. Alan Suenram
323 Use of Enzyme-loaded Erythrocytes In In-Vitro Correction of Arginase-Deficient Erythrocytes In Familial Hyperargininemia
Karel Adriaenssens, Denise Karcher, Armand Lowenthal, and Heinz G. Terhogen
327 Evaluation of Methods of Coenzyme Activation of Erythrocyte Enzymes for Detection of Deficiency of Vitamins B1, B6, and B12
Riad A. Bayoumi and Sidney B. Rosalki
338 Polarographic Method for Rapid Microdetermination of Cholesterol with Cholesterol Esterase and Cholesterol Oxidase
Akio Noma and Keiko Nakayama
341 Gas-Chromatographic Analysis for Succinimide Anticonvulsants in Serum: Macro- and Micro-Scale Methods
James Bonitat
346 Comparison of Results for 13 Clinical Laboratory Determinations with Three Automated Analytical Systems
Eric J. Sampson, Dennis D. Derck, and Laurence M. Demers
350 Statistical Characterization of the Random Errors in the Radioimmunoassay Dose-Response Variable
David Rodbard, Robert H. Lenox, H. Linton Wray, and Douglas Rasmussen
359 Nonchromatographic Radioimmunoassay of Unconjugated Estriol in Plasma, with Polyethylene Glycol as Precipitant
Harvey S. Schiller and Margaret A. Bammall
364 Measurement of 25-Hydroxyvitamin D3 in Serum
Roger Bouillon, Piet Van Kerkhove, and Pieter De Moor

SCIENTIFIC NOTES
369 Simple Fluorometric Determination of Aldosterone in Urine without Use of Isotopes or Chromatography
William R. Whigham
372 Glucose Oxidase Chemiluminescence Measurement of Glucose in Urine Compared with the Hexokinase Method
David C. Williams, Glenn F. Huff, and W. Rudolf Seitz
374 Evaluation of Contemporary Methods for Serum CO2
Jack A. Lustgarten, Ronald J. Creno, Charles G. Byrd, and Robert E. Wenk
379 Modified Colorimetric Method for Procainamide in Plasma
Daniel S. Sitar, Donald N. Graham, Robert E. Rangno, Louis R. Dustresme, and Richard I. Ogilvie
381 Improved Method for Measuring Fibrinogen in Plasma, with Use of a Plasmin Inhibitor
Loren W. Steffen and Barbara W. Steffen

SPECIAL REPORT
G. N. Bowers, Jr., H. U. Bergmeyer, and D. W. Moss

LETTERS
393 Drug Screening for Employment Purposes: The Importance of Telling It Like It Is
Donald R. Wilkinson, Patricia Jensen, and Doris Winsley
393 Further on Light Scatter vs. Turbidimetry
T. O. Tiffany
394 Instrument Control by Computer an Improvement?
Samuel Raymond
(Reply)
James E. Davis and John W. Lewis
394 Laboratory Computers: On- or Off-line?
Samuel Raymond
395 Determination of Salicylate and Its Metabolites in Urine
Gerhard Levy and Josephine Procknal
396 Improved Detection of Morphine on TLC Plates
Joyce A. McIntyre and Arlene E. Armandi
398 Triiodothyronine Radioimmunoassay: Incubation Time, Temperature, and Antiserum
J. C. Standerfer
(Reply)
Paul H. Lenz, George H. Wien, and Janice M. Toth
398 Effective Quality Control
John W. Eastman
399 Volatiles and Chromatometry
Richard M. Rocco

BOOK REVIEWS
400 George G. Guilbault and Morton K. Schwartz
403 THE CLINICAL CHEMIST
J. S. King
