This book consists of papers (through December 1974) selected from the recent literature by a committee of experts. It includes reviews on RIA theory and quality control and detailed methods for determination of steroids, hormones, cyclic AMP, carcinoembryonic antigen, calcitonin, folate, glucagon, immunoglobulins, drugs, renin, and vitamins in biological fluids. There is a total of 41 papers (338 pages).

This book will be useful to toxicologists, clinical chemists, researchers, technologists, and other analysts who want to have at their elbow peer-reviewed papers on this fast-growing technique from CLINICAL CHEMISTRY and related journals, updated when necessary by addenda written by the authors.

The price of this volume is $12.00. To order your copy, please return the form below.

Other books from AACC: Standard Methods of Clinical Chemistry (7 volumes, Academic Press); Amniotic Fluid: Physiology, Biochemistry and Clinical Chemistry (Volume 1 of CURRENT TOPICS IN CLINICAL CHEMISTRY, Wiley & Sons, 1974).

CLINICAL CHEMISTRY, the official journal of the AACC, is only $25.00 (in USA).
AACC has another member-service to be proud of.

GROUP INSURANCE.

Up to $100,000 of term life insurance.*
Up to $1,000 a month of disability income.

Both plans offer excellent benefits at low group rates. They are the only ones endorsed by AACC.

Members at our Houston Annual Meeting will have the first opportunity to participate. All members will be sent information on the plans.

MONY, Mutual Of New York, is the underwriter. And a MONY Representative will be at Houston to answer all your questions and to help you with applications.

*State insurance regulations require that individual policies be issued in Ohio and Texas.
