

clinical chemistry

Journal of the American Association for Clinical Chemistry

- 1 INFORMATION FOR AUTHORS**
- 5 REVIEW: Serum Albumin: Recent Progress in the Understanding of Its Structure and Biosynthesis**
Theodore Peters, Jr.
- 13 REVIEW: Development and Use of Analytical Systems Based on Mass Spectrometry**
Evan C. Horning, David I. Carroll, Ismet Dzidic, Klaus D. Haegele, Shen-Nan Lin, Christian U. Oertli, and Richard N. Stillwell
- 22 REVIEW: Clinical Relevance of Polyamines as Biochemical Markers of Tumor Kinetics**
Diane H. Russell
- 28 Quantitative Alkaline Phosphatase Isoenzyme Determination by Electrophoresis on Cellulose Acetate Membranes**
Werner H. Siede and Ulrich B. Seiffert
- 35 Fetal Lung Maturity, as Assessed by Gas-Liquid Chromatographic Determination of Phospholipid Palmitic Acid in Amniotic Fluid**
M. P. C. Ip, T. F. Draisey, R. J. Thibert, G. L. Gagneja, and G. M. Jasey
- 41 Determination of Plasma and Erythrocyte Lithium Concentrations by Atomic Absorption Spectrophotometry**
H. Hisayasu, Jordan L. Cohen, and Richard W. Nelson
- 46 New Approach to Determination of Total Ketone Bodies in Serum**
Lewis Siegel, Noel I. Robin, and Lester J. McDonald
- 50 Comparison of Double-Antibody Radioimmunoassay with Farr-Technique Radioimmunoassay and Double-Antibody Enzyme Immunoassay for α -Fetoprotein**
Anita Kirkpatrick, H. Terry Wepsic, and Robert M. Nakamura
- 60 Cholesterol and Triglyceride Concentrations in Serum/Plasma Pairs**
Laboratory Methods Committee of the Lipid Research Clinics Program of the National Heart, Lung, and Blood Institute
- 64 Gas-Chromatographic/Mass-Spectrometric Determination of Theophylline in Whole Blood**
Michael Sheehan, Robert H. Hertel, and Christopher T. Kelly
- 69 A Radioimmunoassay for Human Serum Myoglobin: Method Development and Normal Values**
Thomas G. Rosano and Margaret A. Kenny
- 76 New Enzymic Method for Serum Oxalate Determination**
Marguerite Hatch, E. Bourke, and J. Costello
- 79 γ -Glutamyltransferase: Kinetic Properties and Assay Conditions When γ -Glutamyl-4-Nitroanilide and Its 3-Carboxy Derivative Are Used as Donor Substrates**
Leslie M. Shaw, Jack W. London, Donald Fetterolf, and David Garfinkel
- 86 Combined Gel Filtration, Biuret/Copper Method Compared with an Immunochemical Method for Urinary Protein Measurement**
James D. Peele, Jr., Richard H. Gadsden, and C. Boyd Loadholt
- 89 Biochemical Characterization of the Tartrate-Resistant Acid Phosphatase of Human Spleen with Leukemic Reticuloendotheliosis as a Pyrophosphatase**
Kwok-Wai Lam and L. T. Yam
- 95 Comparison of Human Prostatic Acid Phosphatase by Measurement of Enzymatic Activity and by Radioimmunoassay**
Andras G. Foti, Harvey Herschman, and J. Fenimore Cooper
- 100 Comparison of Estimates of Long-Term Analytical Variation Derived from Subject Samples and Control Serum**
George Z. Williams, Eugene K. Harris, and Graham M. Widowson
- 105 Erythrocyte Porphobilinogen Synthase (Delta-Aminolaevulinic Dehydratase) Activity: A Reliable and Quantitative Indicator of Lead Exposure in Humans**
Robert A. Mitchell, John E. Drake, Lisa A. Wittlin, and Thomas A. Rejent
- 112 Automated Computer Analysis for Enzyme-Multiplied Immunological Techniques**
David Rodbard and S. W. McClean
- SCIENTIFIC NOTES**
- 116 Anticonvulsants in Serum, Determined with a Fully Mechanized Enzyme Analyzer**
S. W. McClean, Donald S. Young, and W. Yonekawa
- 119 Enzyme Immunoassay of Serum Thyroxine with the "Auto-Chemist" Multichannel Analyzer**
Robert S. Galen and David Forman
- 122 Automated Turbidimetry of Amylase Activity by Use of a Discrete Kinetic Analyzer**
Herbert Malkus, Joaquin Ibanez, Albert Castro, and Joseph L. DiCesare
- 124 Simplified Micro-Scale Procedure for Preparing Samples for Theophylline Determination by Liquid Chromatography**
J. W. Nelson, A. L. Cordry, C. G. Aron, and R. A. Bartell
- 126 Evaluation of Urinalysis Methods Used in 35 Israeli Laboratories**
Shlomo Assa
- 128 Characteristics of Binding between Reagent-Strip Indicators and Urinary Proteins**
Lemuel Bowie, Stephen Smith, and Nathan Gochman
- SELECTED METHOD**
- 131 Evaluation and Comparison of 10 Glucose Methods and the Reference Method Recommended in the Proposed Product Class Standard (1974)**
Richard B. Passey, Ronald L. Gillum, John B. Fuller, Francis M. Urry, and Mary Louise Giles
- CASE REPORT**
- 140 Double Spike in the Electropherogram of a Myeloma Serum, from Bence Jones Protein**
Adrian O. Vladutiu and Romesh K. Kohli
- SPECIAL REPORT**
- 143 A List of Selected Reference Materials in Clinical Chemistry**
Jacqueline M. Airall
- LETTERS**
- 146 Improved Continuous Flow Enzymatic Determination of Total Serum Cholesterol and Triglycerides**
Paul J. Trocha
- 147 Lack of Significant Inhibition by 4-Nitroaniline Liberated in γ -Glutamyltransferase Assay**
Sidney B. Rosalki
- 148 Urinary Peptides Inhibit DNA Synthesis In Vitro in Certain Cultured Neoplastic Cells**
Stanislaw Gross, Nina Galicka, Maria Grabarczyk, Margaret Giannini, Stanislaw Burzynski, and Zdzislaw Stolzmann
- 149 Evaluation of a Commercially Available Colorimetric Method for Calcium as Performed with the Abbott ABA-100**
Karen Sue Watkins and Robert C. Elser
- 150 Factors Affecting δ -Aminolevulinic Measurement**
Robert S. Alexander, Anthony R. Butler, and Elizabeth Leitch
- BOOK REVIEWS**
- 151 Dean S. Skelley, Nathan Gochman, J. R. Hobbs, George Bryson, and W. E. Cornatzer**
- 155 THE CLINICAL CHEMIST**
J. S. King
