**Corrections**

**Vol. 25**

p 1766: Second paragraph, line four, the reference numbers cited should be (5–11); numbers of all subsequent citations above 10 in text should be increased by one, to correspond with the list of references.

p 1828: In Figure 2, the label on the ordinate is not clear. It reads “counts/10 s x 10^-3.”

p 1930: Under “Determination of Concentrations in Human Plasma,” the injection of dihydroergotamine should be 0.5 mL of a 1 g/L solution.

p 1931: Nine to 12 determinations of binding in the absence of nonradioactive standard were also used to construct the standard curves.

p 1932: In the paragraph preceding Results and in the caption to Figure 3, the amount of compound 2 is 0.5 mg, not 1 mg.

p 2020: In the preparation of phosphate buffer, the second sentence should read: “Dissolve 2.84 g of sodium dihydrogen phosphate in 100 mL of de-ionized water (solution 2).”

p 2021: In the section on extraction of serum under Procedures, the 10 μL of internal standard and 200 μL of sample should be added to 200 μL of phosphate buffer.

**Vol. 26**

p 99: In the caption for Figure 3A, read “r = 0.99,” not “r = 0.09.”

p 176: The sample volume referred to in the fourth paragraph of column three should be 0.15 μL, not “150 mL.”

p 193: Add to reference list:

p 354: In Table 1, last line, columns 2 and 4, substitute “0.12” for “0.16.”
