Perfect balance.
PHOTON™ flexibility and TANDEM-E technology topple the "lock out" systems

TANDEM-E Assay System—cost-effective without sacrificing performance
Saved reagent dollars every month. Single-positive-point calibration means lower cost per patient result—saves up to 100 tubes per month per assay.
Saved labor. Patented TANDEM-E technology offers fewer steps, requires fewer calibrator tubes.
Optimum specificity and sensitivity. Precisely engineered monoclonal antibody-based assays give you confidence in your answers.
Consistent methodology. Eight TANDEM-E immunoassays, all with the same, easy-to-adopt procedure are available now. Additional assays are on the way.

PHOTON series immunoassay analyzers—increase productivity, maintain accuracy
The ultimate in flexibility. It's compatible with virtually any solid-phase end point EIA.
Accurate answers. High-speed computer-controlled optics and multiple data reduction give you confidence.
High throughput. As fast as you can insert tubes you can process patient answers.
Safety net. Comprehensive Service and Support assures you have the answers when needed.

Put the system in your lab with just a single TANDEM-E assay, and discover how practicality can be in perfect balance.

If an Eppendorf Pipette could pipette a sample up to 48 times without refilling, it would look like this.

Imagine an Eppendorf Pipette that dispenses up to 48 times without refilling.
Imagine a pipette that makes serial pipetting at 1-second intervals as easy as pressing a small lever.
Imagine a pipette that eliminates cleaning, contamination, and carryover-error problems with interchangeable Combitips, disposable plastic sample reservoirs available in 6 sizes (0.5, 1.25, 2.5, 5.0, 12.5, and 50 mL capacity).
Imagine a pipette with foolproof 'click-set' volume adjustment dial to select among 5 volume increments for each size Combitip, giving you a choice of 22 different volumes from 10 μL to 5 mL.
Only one pipette can do all this with traditional Eppendorf accuracy, precision and operating ease. Only Eppendorf makes it...the Repeater™; the new repetitive pipette with disposable Combitips.

For literature, write: Brinkmann Instruments Co., Division of Sybron Corporation, Cantague Road, Westbury, NY 11590, or call 516-334-7500.
In Canada: 50 Galaxy Blvd., Rexdale, Ont. M9W 4Y5, or call 416-675-7911.

BRIDGING THE GAP BETWEEN SCIENCE AND BUSINESS
ON THE MOVE

We are a private French company. We have been involved for many years in the Research-Manufacture - and Marketing of clinical diagnostic products.

We have an extensive range of products, specially developed in the following categories: Clinical Chemistry - Quality Control - Enzymology - Immunology and Serology.

We are now a leader in our domestic market. For several years, we have been extending our export activities throughout Europe, Africa, Middle East, South and North America...
