EDITORIALS

Monoclonal Antibodies to Lutropin: Are Our Immunoassays Too Specific? Laurence M. Demers 311

Determination of Stability Jack Zakowski 313

Serum Lipase Activity Is Increased in Disease States Other than Acute Pancreatitis: Amylase Revisited Jerry L. Rosenblum 315

REVIEW

Further Insights into the Pathophysiology of Hyperapobetalipoproteinemia: Role of Basic Proteins I, II, III

Peter O. Kwitterovich, Jr., Mahnaz Motevalli, Michael Miller, Paul S. Bachorik, Stephanie D. Kafonek, Subroto Chatterjee, Terri Beaty, and Donna Virgil 317

ARTICLES

Relation between Debrisquione Oxidation Phenotype and Morphological, Biological, and Pathological Variables in a Large Population

M. Vincent-Viry, J. Muller, B. Fournier, M. M. Galteau, and G. Siest 327

Individual Differences in Lutropin Immunoreactivity Revealed by Monoclonal Antibodies

Kim S. I. Pettersson and Juanita R.-M. Söderholm 333

Analyzing Quality-Control Trends with Moving Slope Charts

S. Jay Smith and Gary L. Myers 341

Quantifying Bone and Liver Alkaline Phosphatase by the Resolution of Two-Component Inactivation Data Obtained with a Centrifugal Analyzer

Rodney W. Forsman and John F. O'Brien 347

Individual Probability for Onset of Full-Blown Disease in Patients Infected with Human Immunodeficiency Virus Type 1

Gilbert Reibnegger, Thomas J. Spira, Dietmar Fuchs, Gabriele Werner-Felmayer, Manfred P. Dierich, and Helmut Wachter 351

Diagnostic and Prognostic Utility of Phospholipase A Activity in Patients with Acute Pancreatitis: Comparison with Amylase and Lipase

Steven C. Kazmierczak, Frederick Van Lente, and Edna D. Hodges 356

Lipase Isoforms and Amylase Isoenzymes: Assays and Application in the Diagnosis of Acute Pancreatitis

John A. Lott and Carrie J. Lu 361

### BOARD OF EDITORS

**Executive Committee:**
- Jack H. Ladenson, Chairman
- William Sch. of Med.
- St. Louis, MO
- Carl A. Burts
- Oak Ridge Natl. Lab.
- Oak Ridge, TN
- Laurence M. Demers, Editors
- Hershey, PA
- Ronald J. Elin, Book Reviews Editor
- Clinical Center, NIH
- Bethesda, MD
- Robert Rej, Reviews Editor
- Wadsworth Center for Labs.
- Albany, NY

**Members:**
- John J. Albers
- Univ. of Washington School of Med.
- Seattle, WA
- Nicholas M. Alexander
- UCSD School of Med.
- San Diego, CA
- Thomas M. Annesley
- Univ. of Michigan
- Ann Arbor, MI
- Fred S. Apple
- Minneapolis, MN
- David N. Bailey

## Relationships between the Proton Nuclear Magnetic Resonance Properties of Plasma Lipoproteins and Cancer

J. D. Otvos, E. J. Jeyarajah, L. W. Hayes, D. S. Freedman, N. A. Janjan, and T. Anderson

## Quantification of Plasma Lipoproteins by Proton Nuclear Magnetic Resonance Spectroscopy

J. D. Otvos, E. J. Jeyarajah, and D. W. Bennett

## Abnormal Concentrations of ClL, ClII, and E Apolipoproteins among Apolipoprotein B-Containing, B-Free, and A-I-Containing Lipoprotein Particles in Hemodialysis Patients

Naji Alsayed and Regis Rebourcet

## Elimination of Undesired Cross-Reagents by Using Mixtures of Antibodies: Experimental and Theoretical Evaluations of Hapten Radioimmunoassays

B. Boutten, E. Ezan, S. Mamas, and F. Dray

## Determination of Product Shelf Life and Activation Energy for Five Drugs of Abuse

Geoffrey Anderson and Milda Scott

## Determination of Cyclosporine by a Competitive Binding Assay with Cyclophilin

G. Steiner, B. Kullinger, G. Mayer, Yu Jie, H. Leibl, J. Kovarik, and W. Wolosczuk

## Use of Chicken Antibodies in Enzyme Immunoassays to Avoid Interference by Rheumatoid Factors

Anders Larsson, Alex Karlsson-Parra, and John Sjöquist

## Interpretations of Five Monoclonal Immunoassays of Lutropin and Folliculin: Effects of Normalization with WHO Standard

I. Vermes, H. A. Bonte, G. v.d. Sluijs Veer, and J. Schoemaker

## DNA Enzyme Immunoassay: General Method for Detecting Products of Polymerase Chain Reaction

Giovanni Mantero, Antonella Zonaro, Alberto Albertini, Paola Bertolo, and Daniele Primi

## Macromolecular Creatine Kinase Type 1: a Serum Marker Associated with Disease

Muriel Laureys, Jean-Paul Sion, Hans Slabynck, Laurette Steenssens, Christa Cobbaert, Marie-Paule Derde, and Frans K. Gorus

## SCIENTIFIC NOTES

### Direct Measurement of High-Density Lipoprotein Cholesterol by the Reflextron Assay with No Manual Precipitation Step

Ronald H. Ng, Katherine M. Sparks, and Bernard E. Statland

### Computerized Method for Validating Laboratory Reference Ranges for Triiodothyronine and Thyroxin Immunoassays

Brian Luttrel and Sally Watters

### Performance of Techniques Used to Detect Drugs of Abuse in Urine: Study Based on External Quality Assessment

J. F. Wilson, J. Williams, G. Walker, P. A. Toseland, B. L. Smith, A. Richens, and D. Burnett
Lipase Activity in Serum Measured with Ektachem Is Often Increased in Nonpancreatic Disorders

Automated Determination of Creatine Kinase Activity in Serum with Use of Thermostable Glucokinase

Genetic Screening of Newborns for Sickle Cell Disease: Correlation of DNA Analysis with Hemoglobin Electrophoresis

Concentration of Mn-Superoxide Dismutase in Serum in Acute Myocardial Infarction

Direct Calibration for Determining Aluminum in Bone and Soft Tissues by Graphite Furnace Atomic Absorption Spectrometry

Urinary Fibronectin Fragments (a Potential Tumor Marker) Measured by Immunoenzymometric Assay with Domain-Specific Monoclonal Antibodies

TECHNICAL BRIEFS

Immunochemiluminescent Assays Based on Acridinium Labels with a Microtiter Plate Luminometer

Sequential Measurements of Urinary Albumin in Recipients of Renal Allografts

Unexpected High Calcitonin Concentrations after Pentagastrin Stimulation

Four Methods Compared for Determining Plasma Creatinine with the Monarch Centrifugal Analyzer

Chemiluminescence and Radioimmunology Compared for 10 Allergens

LETTERS

Preparation of Specific Antiserum to Digitoxin by Using Digitoxin Hemisuccinate-Bovine Serum Albumin Conjugate at the Digitoxose C-3' Position

Interference of D-Mannose in Glucose Measurements by Glucose Oxidase and Hexokinase Methods

More on Pregnancy Tests

Gregory A. Tetrault

Ikuhiro Maeda, Sadao Hayashi, Nobuyuki Amino, and Kiyoshi Miyai

Kristen J. Skogerboe, Sheyla F. West, Magdalena D. Murillo, Michael W. Glass, Santosh Shaunak, and Jonathan F. Tait

Akihiko Usui, Kanefusa Kato, Hideyuki Tsuboi, Takahito Sone, Hiromi Sassa, and Toshio Abe

Lian Liang, Patrick C. D’Haese, Ludwig V. Lamberts, and Marc E. De Broe

Masahiko Katayama, Fumitsugu Hino, Kyoko Kaminagi, Kiyotoshi Sekiguchi, Koji Tadani, and Ikunoshin Kato

J. S. Woodhead and I. Weeks

L. Morelet, C. Legendre, H. Kreis, and B. Lacour

B. Kempter and M. M. Ritter

Heather M. Barbour

D. Roche, H. Susini de Luca, and N. Tugendhaft

Youichi Fujii, Yukihi Ikeda, and Mitsuru Yamazaki

C. S. Ho, S. L. M. Fung, and A. Y. W. Chan

Ditlef Bucher, Fritz Poulsen, and Ulla Rousse (Response) Henrik Christensen, Hans H. Thysen, Ove Scheybye, and Arne Berget

continued on next page
Easier Enzymatic Determination of Guanidinoacetic Acid in Urine

Yoshio Shirokane, Moto-o Nakajima, and Kiyoshi Mizusawa

Apparent Alkaline Phosphatase Activity in Serum Measured with Phosphorylcholine as Substrate

Tsutomu Iino, Makoto Matsushita, Tsugikazu Komoda, and Yoshikatsu Sakagishi
