The Best Choice for Gourmet Cooking

The Best Choice for Lipase Testing
RAICHEM™ LIPASE REAGENT

- Pancreas specific
- Kinetic, colorimetric
- Stable: 21 days at 2°C to 8°C
- Linearity: 600 U/L at 37°C
- Lipase standard included
- Manual and automated assays
- 5 x 10 mL vials and 5 x 30 mL vials — packs include Lipase Standard

WAIT AROUND TIME OR TURNAROUND TIME?

How often are you locked out of your system? On the AIA-1200* and AIA-600, you can load patient samples at any time. Select a complete profile or a single analyte for each sample. And walk away...Come back at any time to add samples, make STAT requests or review data...The AIA-1200 and AIA-600 are always ready to respond. The result: over 1000% improvement in turnaround time.¹ For more information, contact Tosoh Medics today.

¹Based on studies at major medical centers. Details available upon request. *For investigational use only.

AIA-1200 and AIA-600 are trademarks of Tosoh Medics, Inc.

HAVE AMAC AND IMMUNOTECH INVENTED A MORE CONVENIENT WAY TO MEASURE SEROTONIN?

PRECISELY.

AMAC and Immunotech's new solid-phase Serotonin EIA Kit makes it easier for you to make precise determinations of serotonin in tissue, plasma, urine, serum and cerebrospinal fluid. Here's why:

- **Specific and Sensitive.**
  Our kit offers a sensitivity of 0.5 nM or 1.8 pg/sample and correlates very well with HPLC results.

- **Convenient and Economical.**
  The microtiter plate is supplied as 12 removable 8-well strips, so you can run from 8 to 96 samples — small or large assays — in one easy operation.

- **Fast.**
  Our kit requires only one immunological step, for a total assay time of only 4½ hours.
Does your urinalysis system pass the acid test?

Only one system screens for ascorbic acid—
the Behring Rapimat® II/T Urinalysis System

Millions of Americans take ascorbic acid (vitamin C), which can result in decreased or false negative results for urinary blood, glucose, bilirubin and nitrite. Only the Behring Rapimat® II/T Urinalysis System passes the acid test and detects ascorbic acid interference. See for yourself; call for a demonstration.

Advanced technology enhances accuracy and convenience
- Heated LE pad improves sensitivity and specificity, reliably eliminating unnecessary microscopics and cultures
- Color compensation pad improves accuracy by adjusting for urine color variation
- Positive results printed in red for easy identification
- "Hands-off," sanitary disposal of test strips

Cost-saving—
the acid test in today's lab

The challenge for any urinalysis system today is to reduce labor and supply costs. Call us today and see how much the Rapimat® II/T Urinalysis System can save your lab.

Rapimat® II/T Urinalysis System
Performance that passes the acid test

See Polar
With efficiency that pays off in the short run

If you thought that short runs weren’t efficient, you probably haven’t seen the OPUS* Polar Behr run. It’s the first random-access immunoassay system that offers continuous access for routine as well as stat operations. So you’re never locked out from processing your workload—even a single test!

See Polar Behr run practically on its own

With reagents for a single test totally self-contained in a test module, OPUS does most of the work, so you can walk away after very little effort. The protocol is identical for all tests—making it easy for you to increase productivity on all shifts:
- Select test(s) from the interactive touch screen (run any combination of tests simultaneously—no restrictions)
- Load the required OPUS test modules
- Load the sample tray and walk away

See Polar Behr run a broad range of analytes

The versatility of the OPUS technology allows a wide range of tests to be run at a single work station, with a single system. Some of our most exciting options include:
- Therapeutic drug monitoring, thyroid function tests, fertility hormones, infectious disease serology.
- For release in 1991: CMV, Rubella, Toxoplasma, Gentamicin, Tobramycin, Amikacin, LH, FSH, Prolactin, T,

See Polar Behr run in a flash

Results are available in 6 to 21 minutes, depending on the analyte. Here are some examples:
- 5 thyroid panels (ultrasensitive TSH, $T_4$, T-Uptake, including FTI calculation) in 46 minutes
- Quantitative hCG in 15 minutes
- Anticonvulsive panel (phenytoin and phenobarbital) in less than 7 minutes
  - Stat digoxin (with no pretreatment needed) in 16 minutes
  - 75 theophylline tests in 60 minutes
See Polar Behr run for yourself. Call 1-800-321-9898 for a demonstration.

You control all of the system parameters and normative data including the text of the reports;

Calculates amniotic fluid and maternal serum MoM; serum MoM is corrected for maternal weight, race, and insulin-dependent diabetes;

Optional calculation of fetal Down's Syndrome risk using AFP alone or AFP, hCG and/or unconjugated estriol (uE3);

Direct links to most common data management systems (e.g. Photon ERA, IMx, Amerlite, RIA AID);

Optional bidirectional link to a lab mainframe computer.

A detailed brochure and a demonstration diskette are available upon request.

OUR CHEMISTRY ANALYZERS COME WITH OVER 1,200 ACCESSORIES. THIS IS ONE OF THEM.

Technology alone isn’t enough anymore. You need systems that are reliable and easy to use. Designed to fit your exact needs. Backed by people who can keep your instrument running at optimum efficiency.

That’s precisely what you get from Abbott Diagnostics. We’ve developed a full range of chemistry analyzers, so we have at least one system that will fit your specific needs. Whether it’s a small-volume analyzer for the ICU, or a highly flexible main analyzer. And every need in between.

But choosing an Abbott system is just the beginning. You also have the advantage of the most stringent manufacturing quality control of any diagnostics company. The most complete customer training. And the largest and most specialized technical support staff. To make sure that, if a concern arises, it’ll be resolved quickly and thoroughly. From field service to order entry, you can count on every person along the way.

That’s why an Abbott system’s most important accessory is people. People dedicated to keeping your lab running the best way it can. To give you complete peace of mind.

PUT OUR COMMITMENT TO THE TEST.

The Abbott Spectrum®, Series III®, the newest of our chemistry analyzers, joins the Abbott VISION®, Abbott Spectrum®, CC®, Abbott Spectrum® and Abbott Spectrum® EPR to provide a full range of analyzers, to meet a variety of needs.
**BUILDING A NEW LAB?**

LET THE AACC FREE PRODUCT INFORMATION SERVICE PUT YOU IN TOUCH WITH THE VENDORS WhOSE PRODUCTS YOU WILL NEED.

SIMPLY WRITE US A LETTER STATING THE SPECIFICS ABOUT YOUR PROPOSED LAB AND WE WILL DO THE REST.

---

**RIAAID**

RIA AID for data from both isotopic and non-isotopic assays.

**ELISAID**

ELISA AID tailored to give great flexibility of sample placement on the plate.

Software systems for the acquisition, analysis and archiving of immunoassay data.

**SYSTEM FEATURES**

- Direct connection to your beta or gamma counter or plate reader
- Handles data from all assay types: RIA, IRMA, EIA, FIA, ELISA
- Can be configured to service up to 15 counters running simultaneously
- Built-in worklist system
- Results can be offloaded to other software systems (spreadsheet, database)
- Thorough user documentation in plain English
- OEM versions available
