Radioimmunoassay for the determination of intact osteocalcin (BGP)

Coated tube system

Serum standards with intact human osteocalcin (homologous system)

Incubation: one step, over night at 2-8 °C
TurbiTimeSystem™: your next move in protein testing. Hard-copy, economical results within seconds. No waiting for outside reports. No R/QC calculations. No costly interruptions on your other analyzers.

Turbitimer™: a remarkably easy-to-use immuno-turbidimetric instrument designed for low-to-medium volume workloads or as a single-analyte protein analyzer, with step-by-step user prompts and status messages.

Turbiquant® Reagents: precalibrated, ready-to-use and bar coded for automatic identification. Uniform sample-dilution/reagent volumes and a quality-control program with Levy-Jennings plots for accurate, reliable results, test after test.

THE PSA YOUR PATIENTS HAVE RELIED ON.

The quality of patients' lives may rely on PSA. So, it's essential that you trust those results. And thanks to Hybritech's patented dual monoclonal antibody technology, you can feel confident in the results you report. Because small changes can be critical in monitoring prostate cancer patients and should be due to the tumor, not the assay. Fact is, we've been monitoring these patients now for years. With consistency lot-to-lot. Year-to-year. Running up a track record of superb sensitivity, specificity, precision and consistency. Offering a choice of testing formats. From our reference method Tandem\textsuperscript{TM} PSA right up to our 12-minute Hybritech\textsuperscript{TM} Stratus\textsuperscript{TM} PSA\textsuperscript{TM} Assay. Plus our Laboratory Partnership Program can help you expand your cancer diagnostics capabilities. Call your Hybritech representative or 1-800-854-1957 and rely on us.

HYBRITECH CANCER DIAGNOSTICS
DELFIA® System parcels together all the best features of other immunodiagnostic systems

Whether you are measuring cancer markers or thyroid or fertility hormones or performing neonatal screening, most immunodiagnostics systems have their own particular strengths and weaknesses. RIA is sensitive but is beset by safety and legislation problems, EIA and conventional FIA are more convenient but lack sensitivity.

The DELFIA System has only strengths. Based on lanthanide chelate labels, it is safe, sensitive, fast and reliable. There are kits for more than 30 analytes, automation to suit the scale of your lab and MultiCalc software for complete data management and quality control.

DELFIA products are available worldwide through Wallac and Pharmacia sales companies.
In your increasingly demanding role as a specialist in the medicine profession you know that only the perfect size prevents problems – now and in the future. More than 25 years experience has taught us to carefully measure your requirements to find the most suitable solution. And not attempt to sell you products that will restrict you now or may never fit at all. AVL's extensive equipment range, experience and worldwide reputation for quality, innovation and competence ensures a perfect fit whatever your size. Talk to us, and we will tailor-make the perfect fit:

AVL Medical Instruments AG, Stettemerstrasse 28, CH-8207 Schaffhausen/ Switzerland,
Phone (-41) 53/34 16 66, Fax (-41) 53/33 16 17.
And wherever you are – we're there too: with branches and well-choosen agencies in more than 90 countries.

AVL ensures the perfect fit of your blood gas and electrolyte analyzers.

Overview
Cancer remains today as the second leading cause of death among Americans. Due to advances in the understanding of the biochemical and genetic basis of the carcinogenic process, the laboratory has an expanded role in the clinical management of cancer patients.

The 16th Annual Arnold O. Beckman Conference is specifically directed to the clinical chemist and laboratory scientist, and will review the scientific basis of cancer and new approaches towards screening, diagnosis, and monitoring of interventional therapy. In addition, key laboratory issues such as hospital reimbursement, and government regulations regarding the use of new tumor markers and assays will be discussed.

In order to present practical information on cancer testing, two workshops are being included in the Beckman Conference for the first time. The first will focus on defining the basic requirements for providing a cancer testing service, while the second will summarize the current literature on new tumor marker analyses. Complete handouts to both workshops will be given to each participant. The conference will conclude with a discussion of the future of cancer testing.

Featured Speakers
Robert Bast, M.D.
The Future in Cancer Testing
Duke Medical Center
Durham, NC

Gordon Schwartz, M.D.
Diagnosis of Cancer
Thomas Jefferson Medical College
Philadelphia, PA

Gordon Mills, M.D., Ph.D.
Genomic Component of Carcinogenesis
Toronto Hospital
Toronto, Ontario
CANADA

Continuing Education
This program is approved by the AACC for Category 1 ACCENT® Credit hours toward the Clinical Chemists' Recognition Award.

An application for CME credits has been submitted for this program.

Coated 75 mm Hematocrit Tubes Provide An “Added Layer” Of Protection

Avoid Accidental Exposure Due to Broken Sample Tubes

Another new and innovative product from Drummond.
The precision of glass 75 mm Hematocrit tubes, coupled with an overwrap of Mylar, provides accuracy plus enhanced safety in your lab.
To obtain a free sample of this new concept in lab safety, call 1-800/523-7480 or FAX 1-800/582-9222.

Two Of These New Books Belong In Your Reference Library...
One Belongs On Your Night Table!

You’ll find these new publications invaluable in your work. Have the information you need...organized detailed and timely...right at hand when you need it. Plus, there’s a lighthearted, but thoroughly accurate glossary that you’ll want to read just for the sheer joy of it. For your copies or for more information, call toll-free now.

If you're in the Clinical Chemistry field these two reference books are a must!

DORA 1992-93 Directory of Rare Analyses
Edited by Jocelyn M. Hicks, Ph.D. and Donald S. Young, Ph.D.
A complete update of the time-saving reference to sources for rare, but clinically significant tests. Includes over 228 labs and 1,479 tests, 598 of them brand new listings. “Can save countless hours...” ECR. “Difficult to get this information on your own...” AMT Events.
AACC Members $40.00
Non-Members $75.00

Biochemical Basis of Pediatric Disease
Edited by Steven J. Soldin, Ph.D., Nader Rifai, Ph.D. and Jocelyn M. Hicks, Ph.D.
An invaluable reference for clinical chemists and pathologists. Focuses on the understanding of the pathogenesis of pediatric diseases and the laboratory parameters that change with the disease process.
AACC Members $60.00
Non-Members $85.00

Now...a glossary of Clinical Chemistry terms that's actually fun to read!

Hitchhiker's Guide to Clinical Chemistry
By Ian Wilkinson, Ph.D.
Simple, concise, everyday language explanation of most of the commonly measured analytes and related concepts. Avoids "Latrish" and "Chemspeak". For students, trainees and professionals who have to explain concepts to others.
$12.50 (Quantity discounts available)

1993... The Journey Begins

Preparing for market year 2000

BMA 15th Annual Biomedical Marketing Association Conference

Market year 2000. A new age in medical diagnostics. An age of progress. An age of life-saving technological advances. "Medical Dynamics" redefines 21st century healthcare...constantly evolving, progressing, providing new hope...and significantly changing the marketer's role in the healthcare environment. As the journey into a new era begins, preparation is paramount! Attend the 1993 Biomedical Marketing Association Conference...and focus on the dynamics of market year 2000!

MICROSCOPIC SLIDE PREPARATION
Using Epoxy Adhesives

Biological tissue or Rock/Mineral Sectioning

Two epoxies possess all the attributes for impregnating tissue and minerals for microscopic slide preparation.
Bond line thickness <1μm can be achieved with these adhesives. Epoxy can be cured at room or elevated temperature.

EPO-TEK 301
Viscosity — 100 cps
Refractive Index — 1.5380
Shore D Hardness — 61
Spectral Transmission — >97% 320-900 nm

EPO-TEK 301-2
Viscosity — 260 cps
Refractive Index — 1.5640
Shore D Hardness — 82
Spectral Transmission — >96% 300-900 nm

How the Greatest Minds
in Clinical Chemistry
Stay That Way

Join today and get Clinical Chemistry journal
for November and December 1992 FREE!* 
That's 14 issues for the price of 12!

Whether you're a medical technologist, chemist, pathologist, lab technician, director or researcher...if your profession touches the world of clinical chemistry, you need to be a member of the American Association of Clinical Chemistry! AACC gives you a forum to exchange ideas, and solutions -- to share problems -- to keep up-to-date on late-breaking new developments -- to meet new colleagues -- and build crucial professional relationships.

Only AACC membership offers you the opportunity to:

- Receive Clinical Chemistry journal -- FREE*;
- Attend the AACC National Meeting at a 25% discount;
- Meet and network with professional colleagues;
- Be a part of the most dynamic organization for professionals in the clinical chemistry field.

AACC. How the greatest minds in clinical chemistry stay that way.

*Full Members and Student Associates only.
**RIAID**

RIA AID for data from both isotopic and non-isotopic assays.

**ELISAID**

ELISA AID tailored to give great flexibility of sample placement on the plate.

Software systems for the acquisition, analysis and archiving of immunoassay data.

**SYSTEM FEATURES**

- Direct connection to your beta or gamma counter or plate reader
- Handles data from all assay types: RIA, IRMA, EIA, FIA, ELISA
- Can be configured to service up to 15 counters running simultaneously
- Built-in worklist system
- Results can be offloaded to other software systems (spreadsheet, database)
- Thorough user documentation in plain English
- OEM versions available

**Sanofi Diagnostics Pasteur**

Proudly Announces The “Access The Possibilities” Contest Winner

Dr. Robert Elser
York Hospital
York, Pennsylvania

was the winning entry for a trip to Paris, France in the drawing sponsored by Sanofi Diagnostics Pasteur at the 1992 AACC meeting.

Congratulations, Dr. Elser. Au revoir.
