EDITORIAL

Detecting the Renal Effects of Cadmium Toxicity

Patricia W. Mueller 743

REVIEW

Lipase in Serum—the Elusive Enzyme: An Overview

Norbert W. Tietz and Denise F. Shuey 746

ARTICLES

Urinary Proteins and Enzymes as Early Indicators of Renal Dysfunction in Chronic Exposure to Cadmium

Klaus Jung, Monika Pergande, Hans-Joachim Graubaum, Lüder M. Fels, Ulrich Endl, and Hilmar Stolte 757

A Quantitative Measure of Nonlinearity

Kenneth Emancipator and Martin H. Kroll 766

Santica M. Marcovina, John J. Albers, L. Omar Henderson, and W. Harry Hannon 773

Increased Phospholipase A Activities in Sera of Intensive-Care Patients Show sn-2 Specificity but No Acyl-Chain Selectivity

Michael Püttmann, Johannes Aufenanger, Elke von Ochsenstein, Silke Dürholt, Klaus van Ackern, Job Harenberg, and Georg E. Hoffman 782

Lipid Peroxidation and Trace Element Status in Diabetic Ketotic Patients: Influence of Insulin Therapy

Patrice Faure, Paola Corticelli, Marie Jeanne Richard, Josianne Arnaud, Charles Coudray, Serge Halimi, Alain Favier, and Anne Marie Roussel 789

Enzyme Immunoassay of Liver-Type Arginase and its Potential Clinical Application

Masaki Ikemoto, Akira Ishida, Shoji Tsunekawa, Kazue Ozawa, Yasunari Kasai, Masayuki Totani, and Kunihiro Ueda 794

Analysis for Bismuth in Tissue by Electrothermal Atomic Absorption Spectrometry

Anja Slikkerveer, Robertus B. Helmich, and Frederik A. de Wolff 800

Rapid Cycle Allele-Specific Amplification: Studies with the Cystic Fibrosis ΔF508 Locus

Carl T. Wittwer, Bruce C. Marshall, Gudrun H. Reed, and Joshua L. Cherry 804

Subscriptions
Clinical Chemistry (ISSN 0009-9147) is published monthly by the American Association for Clinical Chemistry, Inc., 2029 K Street, NW, Washington, DC, 20006.
Members, domestic and foreign, $95 (inclusive in dues). Subscription payments should accompany the order. Japanese yen price is available from our exclusive agent in Japan: USACO CORPORATION, 13-12, Shimbashi 1-chome, Minato-
kku, Tokyo, 105 Japan. All subscriptions before Oct. 1 start with first issue of current volume. Single copies of current and back-volume issues: $8.00 ($10.00 CCRE); ask for current prices on Special issues. Microfilm/microfiche versions available by volume from University Microfilms International, 300 Veer Rd., Ann Arbor, MI 48106; Contact UMI directly for prices.

Separation of \( \beta \)-Carotene and Lycopene Geometrical Isomers in Biological Samples
Wilhelm Stahl, Alfred R. Sundquist, Michael Hanusch, Wolfgang Schwarz, and Helmut Sies

Glycated Calmodulin from Platelets as an Index of Glycemic Control
Arumugam Muruganandam, G. Jonathan Romans, Roger J. Thibert, Raphael M.-C. Cheung, Thomas F. Draisay, and Bulent Mutus

Rapid Analysis of Hemoglobin Variants by Cation-Exchange HPLC
Ching-Nan Ou and Cheryl L. Rognerud

Fast HPLC Determination of Serum Free Fatty Acids in the Picomole Range
Michael Püttmann, Harald Krug, Elke von Oechsenstein, and Reinhard Kattermann

Increased Fetal Hemoglobin in Insulin-Treated Diabetes Mellitus Contributes to the Imprecision of Glycohemoglobin Measurements
Eric S. Kilpatrick, Michael Small, Alan Rumley, and Marek H. Dominiczak

International Cooperation in Analytical Chemistry: Experience of Antidoping Control at the XI Pan American Games
Jordi Segura, José Antonio Pascual, Rosa Ventura, Juan Ignacio Ustaran, Ángel Cuevas, and Ramón Gonzalez

SCIENTIFIC NOTES

Pyrophosphatase-Based Enzyme-Linked Immunosorbent Assay of Total IgE in Serum
Heikki Peuravuori and Timo Korpela

Intra- and Interlaboratory Sources of Imprecision in Drug Measurements by Different Techniques
Lolita M. Tsanaclis and John F. Wilson

Characterization Procedure for Ion-Selective Electrode Assays of Magnesium Activity in Aqueous Solutions of Physiological Composition
Rudolf Eusteg, Bruno Rusterholz, Angela Schmid, Ursula E. Spichiger, and Wilhelm Simon

Evaluation of Seven Cholestech L· D· X Analyzers for Total Cholesterol Determinations
Eugene J. Rogers, Lorraine Misner, Ira S. Ockene, and Robert J. Nicolosi

Interference of Lysophosphatidylcholine in Hormone Radioimmunoassays
Nathalie Lepage, Kenneth D. Roberts, and Jean Langlais

Assay of Complexed \( \alpha \)-Antichymotrypsin in Plasma
Hans-Heinrich Heidtmann and Klaus Havemann

Reduced Bovine Hemoglobin Solution Evaluated for Use as a Blood Gas Quality-Control Material
John J. Mahoney, Ronald J. Wong, and Antonius L. Van Kessel

Role of Antibody Valency in Hapten-Heterologous Immunooassays
Uri Piran, Deborah Silbert-Shostek, and Eve H. Barlow

Assessment of Copper Status: Effect of Age and Gender on Reference Ranges in Healthy Adults
David B. Milne and Phyllis E. Johnson
Measurement of Urinary Sugars by HPLC in the Estimation of Intestinal Permeability: Evaluation in Pediatric Clinical Practice

D. Willems, S. Cadranel, and W. Jacobs

Monitoring Cancer Antigen 125 in Serum of Ovarian Cancer Patients after Administration of 131I-Labeled F(ab')2 Fragments of OC125 Antibody

Jochen Reinsberg, Birgit Schultes, Uwe Wagner, and Dieter Krebs
