EDITORIAL

Comparison of Immunoassay Technologies

Kim Pettersson 1359

OPINION

Can Medical Decisions Be Standardized? Should They Be?

Mario Werner 1361

ARTICLES

Development and Evaluation of an Osteocalcin Chemiluminescence Immunoassay

Pai C. Kao, B. Lawrence Riggs, and Patricia G. Schryver 1369

General Approach to Correction for Bias in Analytical Performance in Longitudinal Studies Illustrated by Estimating the Effect of Age on \( \gamma \)-Glutamyltransferase Activity

Egbert A. van der Meulen, Nico J. van Sittert, Adriaan G. J. de Koningh, Dick Lugtenburg, and Roel van Strik 1375

Quantification of Lipoprotein(a) Particles Containing Various Apolipoprotein(a) Isoforms by a Monoclonal Anti-Apo(a) Capture Antibody and a Polyclonal Anti-Apolipoprotein B Detection Antibody Sandwich Enzyme Immunoassay

Wendy C. Taddel-Peters, Bryan T. Butman, Gregory R. Jones, Thomas M. Venetta, Paul F. Macomber, and Janet H. Ransom 1382

Kinetics of Plasma Homocysteine in Healthy Subjects after Peroral Homocysteine Loading

Anne Bert Guttmomson, Azam M. Mansoor, Torunn Fiskerstrand, Per M. Ueland, and Helga Refsum 1390

On the Calculation of Reference Change Values, with Examples from a Long-Term Study

José M. Queraltó, James C. Boyd, and Eugene K. Harris 1398

SCIENTIFIC NOTES

Wheat Germ Lectin Affinity Electrophoresis of Serum Alkaline Phosphatase with Commercially Available Agarose Gels

Michael Mattiazzo and Indra Ramasamy 1404

Simple Method for Extracting RNA from Cultured Cells and Tissue with Guanidine Salts

Reza Zolfaghari, Xiaoli Chen, and Edward A. Fisher 1408
**Enzyme Immunoassay of β-Hexosaminidase A and B in Serum: Carrier Detection of GM₁-Gangliosidoses, and Equivalence of Enzyme Activity and Enzyme Protein Reactivity**

Anders Isaksson, Björn Hultberg

**Whole-Blood Cyclosporin G in Renal Transplant Recipients Determined by Two Immunoassays and Liquid Chromatography**

James H. McBride, Steaven S. Kim, Gabriel M. Danovitch, Denis O. Rodgerston, Ana F. Reyes, and May K. Ota

**Measuring Alveolar Lavage Fluid Surfactant by Fluorescence Polarization**

Nuala A. McCarrol and Frederick Van Lente

**Polymorphism of Apolipoprotein E, Lipoprotein(a), and Other Lipoproteins in Children with Type I Diabetes**

Branika Salzer, Ana Stavlačić, Günther Jürgens, Miroslav Dumić, and Ana Radica

**Electrochemical Homogeneous Enzyme Immunoassay of Theophylline in Hemolyzed, Icteric, and Lipemic Samples**

Haiou Yao, Sarah H. Jenkins, Amadeo J. Pesce, H. Brian Halsall, and William R. Heineman

**Time-Resolved Immunoimmunochemistry and Other Frequently Used Immunoassay Types for Follicle-Stimulating Hormone**

Stephan Madersbacher, Tang Shu-Chen, Siegfried Schwarz, Stephan Dinrhofener, George Wick, and Peter Berger

**Stable Liposomes for Assays of Human Sera**

Yoshio Ishimori and Kyuji Rokugawa

**CASE REPORT**

Transferrin Allelic Variants May Cause False Positives in the Detection of Cerebrospinal Fluid Fistulae

Andrew J. Sloman and Robert H. Kelly

### 1992 CLINICAL CHEMISTRY FORUM—Accuracy and Precision Goals in Clinical Chemistry Testing: Can They Be Defined by Medical Relevance?

Guest Editor, Robert Rej

**Accuracy and Precision Goals in Clinical Chemistry Testing: Can They Be Defined by Medical Relevance?**

Basil T. Doumas

**Desirable Standards for Laboratory Tests If They Are to Fulfill Medical Needs**

Callum G. Fraser and Per Hyttoft Petersen

**The History of Evaluation Criteria for CAP Surveys**

William B. Hamlin

**Governmental Perspectives on Evaluating Laboratory Performance**

D. Joe Boone

**Physician Judgment in Clinical Settings: Methodological Influences and Cognitive Performance**

Neal V. Dawson

Analytical Goals Developed from the Inherent Error of Medical Tests
John W. Ross and Martin D. Fraser

Variability of Lipid Measurements: Relevance for the Clinician
Gordon Schectman and Edward Sasse

Cholesterol—a Model System to Relate Medical Needs with Analytical Performance
Donald A. Wiebe and James O. Westgard

Tolerance Limits for Short-Term Analytical Bias and Analytical Imprecision Derived from Clinical Assay Specificity
George G. Klee

Linking Medical Needs and Performance Goals: Clinical and Laboratory Perspectives on Thyroid Disease
Ian D. Hay and George G. Klee

Analytical Performance Goals for Measuring Prostate-Specific Antigen
Herbert A. Fritsche and Richard J. Babaian

Medically Relevant Laboratory-Performance Goals: A Listing of the Complexities and a Call for Action
David L. Witte

Open Discussion

Special Assignments and Closing Comments
Basil T. Doumas and Donald A. Senhauser

TECHNICAL BRIEF

Dibucaine Number Measured with the Ektachem System
Giampiero Cattazzo, Carlo Franzini, and Michele Rettondini

LETTERS

Measurement of Serum Creatinine
Jasbir Singh and Neil Greenberg
(Respons e) Ronald D. Perrone, Nicolaos E. Madias, and Andrew S. Levey

Regression Workstation for Clinical Chemistry Method Evaluation
Gerald J. Kost, Michael Inn, and Teri Johnson

Hook Effect in Immunoradiometric Assay of CA 125 in Peritoneal Fluid: Evidence of High CA 125 Concentrations by a Comparative Immunoblotting Analysis
Antonella Barbati, G. C. Di Renzo, and E. V. Cosmi

Resolution and Medical Utility Frequency Improves on Minimum Distinguishable Difference
Kicab Castañeda-Méndez
(Respons e) William A. Sadler, Lynda M. Murray, and John G. Turner

5'-Nucleotidase Isoforms Distinguished from Hepatic and Biliary Alkaline Phosphatase Isoenzymes in Serum by Isofocusing Electrophoresis
Vadiraja V. Murthy and Arthur Karmen
