In This Issue...

- PCR to Detect α-Thalassemias
- Reference Intervals:
  - Determined from Data for Hospitalized Patients
  - Verification by a Monte Carlo Technique
- Mitochondrial Oxidation Disorders
- FK-506 Monitoring
TaqStart™ PCR – The most convenient approach to Hot Start PCR

Introducing TaqStart™ Antibody

TaqStart Antibody gives you all the benefits of Hot Start PCR...without the hassle. With TaqStart, you get enhanced specificity, improved sensitivity, and higher yields in PCR amplifications, with greater convenience than with any other Hot Start method. This unique monoclonal antibody blocks Taq DNA polymerase activity during set-up of your PCR reactions. When thermal cycling begins, TaqStart dissociates from Taq; thus, Taq becomes fully active and amplification proceeds optimally. That's all. No messy waxes. No contamination from open tubes. No hassle. TaqStart Antibody. The simple, one-step, no-wax approach to Hot Start PCR. Only from CLONTECH. Call 1-800-662-CLON or contact your local distributor.

Results of the use of TaqStart Antibody to enhance specificity in long-distance PCR amplifications. Lanes 2 & 3: human p53 fragment (3.7 kb) without and with TaqStart, respectively. Lanes 4 & 5: human IFN-α receptor fragment (9.3 kb) without and with TaqStart, respectively. Lanes 1 & 6: φX174/HaeIII digest.

DONT EXPERIMENT WITH ANYTHING ELSE.

CLONTECH
Information for Authors

Clinical Chemistry welcomes manuscripts containing original information, experimental or theoretical, that advances the science of clinical chemistry. Such information may concern analytical and molecular diagnostic techniques, instrumentation, data processing, statistical analyses of data, clinical investigations in which chemistry has played a major role, and laboratory animal studies of chemically oriented problems of human disease. Equal consideration is given to manuscripts in English from any country, whether or not the authors are members of the AACC. Manuscripts are usually evaluated by two reviewers who may or may not be members of the Editorial Board. Manuscripts found by the editors to be inappropriate for the journal may be returned to authors without peer review. Prospective authors of Editorials and Reviews should submit, for review by the Editor, a brief outline of the proposed manuscript before preparing it in final form. Authors are usually notified of the disposition of a manuscript within 6 weeks of the date of its receipt by the Editor.

Editorial Policies. Manuscripts are considered for publication with the understanding that (a) each author has participated significantly in the work and assumes responsibility for the manuscript's content; (b) the authors have disclosed any commercial associations that might pose a conflict of interest with the work submitted; (c) no paper presenting the same information—other than an abstract or preliminary report or poster (cited in the manuscript)—has been or will be published elsewhere; (d) unique materials necessary to reproduce the results reported are available for use by qualified investigators; and (e), if the paper is accepted, copyright is transferred to the publisher. These agreements must be conveyed by completing the Author's Assurances and Assignment of Copyright form that can be copied from page 6 of the Information for Authors published in the January issue of the journal, or obtained from the Washington editorial office. All authors must sign the form, and original signatures are required; the form should be sent by mail, not Fax.

Authors citing unpublished work by individuals other than themselves should include with their manuscript a letter from the individuals concerned giving permission to cite the work. For studies conducted with humans, a statement in the text should indicate whether the procedures used were in accordance with the ethical standards of their institution's responsible committee or with the Helsinki Declaration of 1975, as revised in 1983.

Submission of Manuscripts. Submit four copies of the manuscript to Dr. David E. Bruns, Editor, Clinical Chemistry. For regular mail: PO Box 3757, University Station, Charlottesville, VA 22903-0757. For express delivery: Towers Office Building, Suite 609, 1224 West Main Street, Charlottesville, VA 22903. Include a covering letter stating (a) the title of the paper; (b) the paper's main point; and (c) the name, address, and telephone and Fax numbers of the corresponding author.

Manuscript Preparation. Use double (typewriter) or triple (word processor) spacing throughout the manuscript. Type or print on one side of each page. For most manuscripts, include the following sections: an abstract, introduction, materials and methods, results, discussion, and references. For Reviews and Case Reports, use headings appropriate to the text. After tentative acceptance, revised version of manuscripts should be submitted on disk.

Illustrations. Submit four copies of each figure on high-quality coated glossy or laser-printer paper. Photocopy on absorbent or bond paper are not acceptable. Verify that symbols and lettering will be legible when the figures are reduced to publication size. Final version of figures should be supplied on disk as well as on hard copy. The complete Information for Authors is published in the January issue.

Subscriptions and Reprints:

Telephone: 1-800-892-1400; Fax: 1-202-887-5093

Reprints: Reprint order forms are mailed to authors with proofs of their manuscripts and can also be obtained from Francis Alvero at the numbers shown above. Minimum order is 100 copies.

Missing Copies: Claims will not be allowed (a) unless we are notified within 3 months after the issue date for domestic and Canadian subscribers, or 6 months after the issue date for foreign subscribers; (b) if notice of a recent change of address has not been received; or (c) if the reason for claim is "missing from files." For claims to be processed, the subscriber's number and exact name and address as they appear on the mailing list must be included in correspondence.

Back Issues: Single copies of current and back-volume issues: $15.00 ($20.00 CCRE); ask for special prices on Special Issues. Microfilm/microfiche versions available by volume from University Microfilms International, 300 Veeb Rd, Ann Arbor, MI 48106; contact UMI directly for prices.

Indexing Services: Clinical Chemistry is covered by the major indexing and abstracting services, including the following: Abstracts Express, Analytical Abstracts, Biological Abstracts, BIOSIS, Chemical Abstracts Service, Current Clinical Cancer, Current Contents/Life Sciences, Excerpta Medica/EMBASE, Index Medicus, MEDLINE, Reference Update, Research Alert, Science Citation Index, and SciSearch. The full text of Clinical Chemistry, starting with Vol. 38, No. 1, is available online through BRS Colleague.

Copyright Permission: Reprographic copying beyond that permitted by Sections 107 or 108 of the US Copyright Law is authorized by the American Association for Clinical Chemistry, Inc., for internal or personal use, provided that (a) the base fee of $2.50 per copy is paid directly to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, or (b) a photocopy license has been granted by the CCC. Fees are subject to change. This consent does not extend to other kinds of copying, such as for general or external distribution, resale, advertising, or promotional purposes or for creating new collective works; for these purposes, contact AACC Inc., 2101 L Street, NW, Suite 205, Washington, DC 20037-1526.

Disclaimers: Manuscripts published in Clinical Chemistry reflect the individual views of their authors and, in the absence of a statement to the contrary, not the views of the institutions with which the authors are affiliated. The contents of advertisements or articles are not to be construed as official statements, evaluations, or endorsements by the Board of Editors or the American Association for Clinical Chemistry, Inc.

Clinical Chemistry is printed with organic-based inks.

4A CLINICAL CHEMISTRY, Vol. 40, No. 12, 1994
INTRODUCING OURSELVES:

Klinisches Labor
Clinical Laboratory
(International Edition)

Journal for Clinical Laboratories and Blood Transfusion Serology

Listed in: CAS ONLINE, CHEMICAL ABSTRACTS, Clinical Chemistry Lookout, Current Advances in Clinical Chemistry, Current Contents - Clinical Practice, Excerpta Medica/EMBASE

We regularly publish in English and/or German:

- Original articles, posters, lectures
- Reviews concerning topics of current medical interest, e.g. tumor markers, osteoporosis
- Short surveys of more voluminous publications
- Headlines informing you in one sentence about medical research results
- Reports on transfusion serology
- Notes on current topics
- The latest news from the fields of medicine and technology
- Book reviews, congress announcements, health statistics
  
Special features of the journal are immunoassays and DNA/RNA analysis

Are you interested?
If so, you should become acquainted with the journal CLINICAL LABORATORY / KLINISCHES LABOR!

The annual subscription rate (10 monthly issues) is $ 130.00 (postage included). In return you will receive more than 1000 pages of scientific information.

## Pursuing Medical Relevance
February 5-6, 1995 • Omni Hotel, Charleston, S.C.

### Overview
The role of the laboratory professional is changing. Health Care Reform with its increasing focus on cost containment and more structured and controlled delivery of care is prompting an increasing focus on clinical outcomes. As a result, clinical laboratorians must change their focus. For the last several decades, clinical laboratory professionals have been most interested in the analytical performance of their laboratories. There is no question this has resulted in ever increasing quality and efficiency of modern clinical laboratories. However, the current health care environment demands more than just high quality—there is an expectation that all components of our health care system be rationalized based on their contribution to the overall clinical and quality of life outcomes of the treatment plan.

### Featured Speakers
- **Hope Foster, J.D.**, Partner, O'Connor & Hamann, Washington, DC
- **Edward T. Wong, M.D.**, Professor & Vice Chairman, Dept. of Pathology & Lab Medicine, University of Southern California, Los Angeles, CA
- **John Kelly, M.D., Ph.D.**, Chief Medical Officer, CMIS, Malvern, PA
- **Jay M. McDonald, M.D.**, Professor & Chairman, Department of Pathology, The University of Alabama, Birmingham, AL

### Continuing Education
This program has been approved for 11 CME credit hours. For additional information, please contact the AACC Meetings Department. This program is also approved by the AACC for 11 Category I ACCREDIT Credit hours toward the Clinical Chemists' Recognition Award.

### Sponsored by:
American Association for Clinical Chemistry, Inc.

ria Aid for data from both isotopic and non-isotopic assays.

ELISA Aid tailored to give great flexibility of sample placement on the plate.

Software systems for the acquisition, analysis and archiving of immunoassay data.

**SYSTEM FEATURES**
- Direct connection to your beta or gamma counter or plate reader
- Handles data from all assay types: RIA, IRMA, EIA, FIA, ELISA
- Can be configured to service up to 15 counters running simultaneously
- Built-in worklist system
- Results can be offloaded to other software systems (spreadsheet, database)
- Thorough user documentation in plain English
- OEM versions available

**U.S. POSTAL SERVICE STATEMENT**

Required by the Act of 12 August 1970, Section 3685. Title 39, United States Code, showing the ownership, management, and circulation of this publication.

1-6. Clinical Chemistry is published monthly at 2101 L Street, N.W., Suite 222, Washington, D.C. 20037. Date of filing: 10/2/1994. This is also the address of the publisher, American Association for Clinical Chemistry, Inc. The executive editor is David E. Brooks, M.D., whose address is Towers Office Building, 1224 West Main Street, Suite 500, Charlottesville, VA 22903. The managing editor is Leah Blackburn, whose address is 2101 L Street, N.W., Suite 222, Washington, D.C. 20037. The owner is American Association for Clinical Chemistry, Inc., 2101 L Street N.W., Suite 202, Washington, D.C. 20037. Stockholders: None. 8. Known bondholders, mortgagees, and other security holders holding 1 percent or more of the total amount of bonds, mortgages, or other securities: None. 9. The purpose, function, and nonprofit status of this organization and the exempt status for federal income tax purposes have not changed during the preceding 12 months. 10. The average number of copies of each issue during the preceding 12 months is (A) Total number of copies printed: 16,719; (B) Paid Circulation: (1) Sales through dealers and carriers, street vendors, counter sales: None; (2) Mail Subscriptions: 13,012; (C) Total Paid Circulation: 13,312; (D) Free distribution by mail, carrier, or other means; samples, complimentary, and other free copies: 687; (E) Total distribution: 13,940; (F1) Office use, leftover, unaccounted, spoiled after printing: 2,760; (F2) Returns from news agent: None; (G) Total: 16,719.

Actual number of copies of single issue published nearest to filing date are (A) Total number of copies printed: 17,214; (B) Paid Circulation: (1) Sales through dealers and carriers, street vendors, counter sales: None; (2) Mail Subscriptions: 14,042; (C) Total Paid Circulation: 14,042; (D) Free distribution by mail, carrier, or other means; samples, complimentary and other free copies: 651; (E) Total distribution: 14,693; (F1) Office use, leftover, unaccounted, spoiled after printing: 2,521; (F2) Returns from news agent: None; (G) Total: 17,214.

I certify that the statements made by me above are correct and complete (Signed) Christopher N. Hoelzel Clinical Chemistry, Publications Director
