In This Issue ...

- Iatrogenic Aluminum Poisoning
- Accuracy of Serum Theophylline Measurements
- Fetal Carboxyhemoglobin
- Plasma Lipoproteins in Apo E2 Homozygotes
- Mutations in Lactate Dehydrogenase H(B) Deficiency
Choose the one antibiotic that alone kills a broad spectrum of *Mycoplasma*, as well as gram-negative and gram-positive bacteria at one low dose.

Ciprofloxacin, a new fluoroquinolone, has been demonstrated to be safe, stable and effective as an antimicrobial in diverse diagnostic systems.

*Stop wasting time and money – Start using Ciprofloxacin.*

Call 800/227-9412 for a technical brochure on Ciprofloxacin.
Information for Authors

Clinical Chemistry welcomes manuscripts containing original information, experimental or theoretical, that advances the science of clinical chemistry. Such information may concern analytical and molecular diagnostic techniques, instrumentation, data processing, statistical analyses of data, clinical investigations in which chemistry has played a major role, and laboratory animal studies of chemically oriented problems of human disease. Equal consideration is given to manuscripts in English from any country, whether or not the authors are members of the AACC. Manuscripts are usually evaluated by two reviewers who may or may not be members of the Editorial Board. Manuscripts found by the editors to be inappropriate for the journal may be returned to authors without peer review. Prospective authors of Editorials and Reviews should submit, for review by the Editor, a brief outline of the proposed manuscript before preparing it in final form. Authors are usually notified of the disposition of a manuscript within 6 weeks of the date of its receipt by the Editor.

Editorial Policies. Manuscripts are considered for publication with the understanding that (a) each author has participated significantly in the work and assumes responsibility for the manuscript's content; (b) the authors have disclosed any commercial associations that might pose a conflict of interest with the work submitted; (c) no paper presenting the same information - other than an abstract or preliminary report or poster (cited in the manuscript) has been or will be published elsewhere; (d) unique materials necessary to reproduce the results reported are available for use by qualified investigators; and (e), if the paper is accepted, copyright is transferred to the publisher. These agreements must be conveyed by completing the Author's Assurance and Assignment of Copyright form that can be copied from page 6 of the Information for Authors published in the January issue of the journal, or obtained from the Washington editorial office. All authors must sign the form, and original signatures are required; the form should be sent by mail, not Fax.

Authors citing unpublished work by individuals other than themselves should include with their manuscript a letter from the individuals concerned giving permission to cite the work. For studies conducted with humans, a statement in the text should indicate whether the procedures used were in accordance with the ethical standards of their institution's responsible committee or with the Helsinki Declaration of 1975, as revised in 1983.

Submission of Manuscripts. Submit four copies of the manuscript to Dr. David E. Bruna, Editor, Clinical Chemistry. For regular mail: PO Box 3737, University Station, Charlottesville, VA 22903-0737. For express delivery: Towers Office Building, Suite 609, 1224 West Main Street, Charlottesville, VA 22903. Include a covering letter stating (a) the title of the paper; (b) the paper's main point; and (c) the name, address, and telephone and Fax numbers of the corresponding author.

Manuscript Preparation. Use double (typescript) or triple (word processor) spacing throughout the manuscript. Type or print on one side of each page. For most manuscripts, include the following sections: an abstract, introduction, materials and methods, results, discussion, and references. For Reviews and Case Reports, use headings appropriate to the text. After tentative acceptance, revised version of manuscripts should be submitted on disk.

Illustrations. Submit four copies of each figure on high-quality coated glossy or laser-printer paper. Photocopies on absorbent or bond paper are not acceptable. Verify that symbols and lettering will be legible when the figures are reduced to publication size. Final version of figures should be supplied on disk as well as on hard copy.

The complete Information for Authors is published in the January issue.

Subscriptions and Reprints:

Telephone: 1-800-892-1400; Fax: 1-202-887-5093

Reprints: Reprint order forms are mailed to authors with proofs of their manuscripts and can also be obtained from Francis Alvero at the numbers shown above. Minimum order is 100 copies.

Missing Copies: Claims will not be allowed (a) unless we are notified within 3 months after the issue date for domestic and Canadian subscribers, or 6 months after the issue date for foreign subscribers; (b) if notice of a recent change of address has not been received; or (c) if the reason for claim is "missing from files." For claims to be processed, the subscriber's number and exact name and address as they appear on the mailing list must be included in correspondence.

Back Issues: Single copies of current and back-volume issues: $12.00 ($15.00 CC); ask for current prices on Special Issues. Microfilm/microfiche versions available by volume from University Microfilms International, 300 Veeb Rd., Ann Arbor, MI 48106; contact UMI directly for prices.

Indexing Services: Clinical Chemistry is covered by the major indexing and abstracting services, including the following: Abstracts Express, Analytical Abstracts, Biological Abstracts, BIOSIS, Chemical Abstracts Service, Current Clinical Cancer, Current Contents/Life Sciences, Excerpta Medica/EMBASE, Index Medicus, MEDLINE, Reference Update, Research Alert, Science Citation Index, and SciSearch. The full text of Clinical Chemistry, starting with Vol. 38, No. 1, is available online through BRS Colleague.

Copyright Permission: Reprographic copying beyond that permitted by Sections 107 or 108 of the US Copyright Law is authorized by the American Association for Clinical Chemistry, Inc., for internal or personal use, provided that (a) the base fee of $2.50 per page is paid directly to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, or (b) a photocopy license has been granted by the CCC. Fees are subject to change. This consent does not extend to other kinds of copying, such as for general or external distribution, resale, advertising, or promotional purposes or for creating new collective works; for these purposes, contact AACC Inc., 2101 L Street, NW, Suite 202, Washington, DC 20037-1526.

Disclaimers: Manuscripts published in Clinical Chemistry reflect the individual views of their authors and, in the absence of a statement to the contrary, not the views of the institutions with which the authors are affiliated. The contents of advertisements or articles are not to be construed as official statements, evaluations, or endorsements by the Board of Editors or the American Association for Clinical Chemistry, Inc.

Clinical Chemistry is printed with organic-based inks.

4A CLINICAL CHEMISTRY, VOL. 40, No. 8, 1994
This is Not Another Glucose Meter

No timing, blotting or wiping. No fumbling with the patient’s finger to apply blood to a test strip. Simply touch the microcuvette to a drop of blood and it fills by capillary action. Then place it in the instrument. No interference from hematocrit or reducing substances such as ascorbic or uric acid.

Lab Quality Results

HemoCue® Blood Glucose is a diagnostic instrument rather than a screening meter. When compared to another laboratory method a correlation coefficient of 0.99 is attainable. C.V.’s are 2 – 5%. This can be verified in your laboratory.

Safe for Patients and Staff

Extra measures to reduce the risk of cross contamination from patient to meter to the next patient are not necessary with HemoCue® Blood Glucose.

High degree of acceptance from Nursing Staff

The differences between the HemoCue® Blood Glucose Analyzer and test strip meters are immediately apparent to any Nursing Staff. Nurses love the ease of use and increased reliability of results that come with using this exciting new technology.

Call now for a “Free Trial” of the HemoCue® Blood Glucose Analyzer
**RIA AID**
RIA AID for data from both isotopic and non-isotopic assays.

**ELISA AID**
ELISA AID tailored to give great flexibility of sample placement on the plate.

Software systems for the acquisition, analysis and archiving of immunoassay data.

**SYSTEM FEATURES**
- Direct connection to your beta or gamma counter or plate reader
- Handles data from all assay types: RIA, IRMA, EIA, FIA, ELISA
- Can be configured to service up to 15 counters running simultaneously
- Built-in worklist system
- Results can be offloaded to other software systems (spreadsheet, database)
- Thorough user documentation in plain English
- OEM versions available
