Bad Antibody?

StatLIA® immunoassay software immediately tells you if your antibody is bad. Really. Along with your tracer, buffer, incubation conditions ... or any of the 9 components.

StatLIA's unique standard curve lets you review an assay's reliability quickly, by graphing confidence limits, a reference curve, and the current assay's replicate data points.

Plus, with StatLIA you can:
• Immediately pinpoint the cause of a flagged assay without repeating it
• Detect fluctuations in standard curves and their causes
• Measure the effect of reagent variations on your results
• Determine if an assay is bad, even though the controls are in
• Connect all your immunoassay instruments on-line
• Analyze each tech's performance for each test method

Find out why StatLIA is now used by major clinical, pharmaceutical, research and government laboratories throughout North America.

Information for Contributors

Clinical Chemistry welcomes manuscripts containing original information, experimental or theoretical, that advances the science of clinical chemistry. Such information may concern analytical and molecular diagnostic techniques, instrumentation, data processing, statistical analyses of data, clinical investigations in which chemistry has played a major role, and laboratory animal studies of chemically oriented problems of human disease. Equal consideration is given to manuscripts in English from any country, whether or not the authors are members of the AACC. Manuscripts are usually evaluated by two reviewers who may or may not be members of the Editorial Board. Manuscripts found by the editors to be inappropriate for the journal may be returned to authors without peer review. Prospective authors of Editorials and Reviews should submit, for review by the Editor, a brief outline of the proposed manuscript before preparing it in final form. Authors are usually notified of the disposition of a manuscript within 6 weeks of the date of its receipt by the Editor.

Editorial Policies. Manuscripts are considered for publication with the understanding that (a) each author has participated significantly in the work and assumes responsibility for the manuscript’s content; (b) the authors have disclosed any commercial associations that might pose a conflict of interest with the work submitted; (c) no paper presenting the same information—other than an abstract or preliminary report or poster (cited in the manuscript)—has been or will be published elsewhere; (d) unique materials necessary to reproduce the results reported are available for use by qualified investigators; and (e), if the paper is accepted, copyright is transferred to the publisher. These agreements must be conveyed by completing the Author’s Assurances and Assignment of Copyright form, which can be copied from page 6 of the Information for Contributors published in the January issue of the journal, or obtained from the Washington editorial office. All authors must sign the form, and original signatures are required; the form should be sent by mail, not fax.

Authors citing unpublished work by individuals other than themselves should include with their manuscript a letter from the individuals concerned giving permission to cite the work. For studies conducted with humans, a statement in the text should indicate whether the procedures used were in accordance with the ethical standards of their institution’s responsible committee or with the Helsinki Declaration of 1975, as revised in 1983.

Submission of Manuscripts. Submit four copies of the manuscript to Dr. David E. Bruns, Editor, Clinical Chemistry. For regular mail: PO Box 3757, University Station, Charlottesville, VA 22903-0757. For express delivery: Suite 608, 1224 West Main Street, Charlottesville, VA 22903. Include a covering letter stating (a) the title of the paper; (b) the paper’s main point; and (c) the name, address, telephone and fax numbers, and E-mail address of the corresponding author.

Manuscript Preparation. Use double (typewriter) or triple (word processor) spacing throughout the manuscript. Type or print on one side of each page. For most manuscripts, include the following sections: an abstract, introduction, materials and methods, results, discussion, and references. For Reviews and Case Reports, use headings appropriate to the text. For tentative acceptance, revised version of manuscripts should be submitted on disk.

Illustrations. Submit four copies of each figure on high-quality coated glossy or laser-printer paper. Photocopies on absorbent or bond paper are not acceptable. Verify that symbols and lettering will be legible when the figures are reduced to publication size. Final version of figures should be supplied on disk as well as on hard copy.

The complete Information for Contributors is published in the January issue.

Subscriptions and Reprints:
Telephone: 1-800-892-1400; Fax: 1-202-887-5093

Reprints: Reprint order forms are mailed to authors with proofs of their manuscripts and can also be obtained from Tina Blume, at the numbers shown above. Minimum order is 100 copies.

Missing Copies: Claims will not be allowed (a) unless we are notified within 3 months after the issue date for domestic and Canadian subscribers, or 6 months after the issue date for foreign subscribers; (b) if notice of a recent change of address has not been received; or (c) if the reason for claim is “missing from files.” For claims to be processed, the subscriber’s number and exact name and address as they appear on the mailing list must be included in correspondence.

Back Issues: Single copies of current and back-volume issues: $15.00 ($20.00 CCRE); ask for current prices on Special Issues. Microfilm/microfiche versions available by volume from University Microfilms International, 300 Veeb Rd., Ann Arbor, MI 48106; contact UMI directly for prices.

Indexing Services: Clinical Chemistry is covered by the major indexing and abstracting services, including the following: Abstracts Express, Analytical Abstracts, Biological Abstracts, BIOSIS, Chemical Abstracts Service, Current Awareness in Biological Sciences, Current Clinical Cancer, Current Content/Life Sciences, Excerpta Medica/EMBASE, Index Medicus, MEDLINE, Reference Update, Research Alert, Science Citation Index, and SciSearch. The full text of Clinical Chemistry, starting with Vol. 38, No. 1, is available online through BRS Colleague.

Copyright Permission: Reprographic copying beyond that permitted by Sections 107 or 108 of the US Copyright Law is authorized by the American Association for Clinical Chemistry, Inc., for internal or personal use, provided that (a) the base fee of $2.50 per copy is paid directly to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, or (b) a photocopy license has been granted by the CCC. Fees are subject to change. This consent does not extend to other kinds of copying, such as for general or external distribution, resale, advertising, or promotion purposes or for creating new collective works; for these purposes, contact AACC Inc., 2101 L Street, NW, Suite 202, Washington, DC 20037-1526.

Disclaimers: Manuscripts published in Clinical Chemistry reflect the individual views of their authors and, in the absence of a statement to the contrary, not the views of the institutions with which the authors are affiliated. The contents of advertisements or articles are not to be construed as official statements, evaluations, or endorsements by the Board of Editors or the American Association for Clinical Chemistry, Inc.

Clinical Chemistry is printed on chlorine-free inks.

4A CLINICAL CHEMISTRY, Vol. 41, No. 6, 1995
Announcement

The IFCC-AVL Awards
for significant advances in critical care testing.

Unique award procedure: a two-level selection system.
Contest open to candidates under 40 years of age, laboratory medicine scientists, clinicians, at national and international level.

International Award
The winner will receive a prize of thirty thousand US Dollars which should go towards future research. The IFCC Awards Committee will select the winner from a group of ten finalists. The award will be presented at the International Congress of Clinical Chemistry (ICCC) in London, 8th—12th July 1996.

National Awards
Each winner will receive a prize of one thousand US Dollars. The national award committees will select the winners from the applicants in each country. Each award will be presented on a suitable occasion by the national society in clinical chemistry.

The IFCC Awards Committee will select from national award winners the ten finalists who will compete for the international award in London.

Topics
Any clinical or laboratory study related to critically ill patients e.g. involving technology, therapy, application or interpretation of tests, patient management or cost benefits.

Application Package
Detailed information about the IFCC-AVL Award and an application package are available to all scientists and clinicians working in a field related to critical care testing. Please write, fax or e-mail to:

IFCC-AVL Award Secretariat
P. O. Box 1140, CH-8207 Schaffhausen/Switzerland
fax +41-53-33 16 17, e-mail: AWARD@avl.inet.ch
Want to get a better Job?
Want to increase your exposure in the Job Market?

Enroll in the AACC Employment Service

- Circulate your résumé
- Receive over 100 job announcements
- Interview during AACC's Annual Meeting July 17-19 in Anaheim, California

Enroll now and you'll be in the 1995-96 Résumé Book at the Annual Meeting. And for a full year we'll circulate your résumé to participating employers. And you'll get the 1995-96 Jobs Packet in the mail after the meeting.

Call 1-800-892-1400, ext. 710 or fax 202-887-5093

All AACC members will receive enrollment information in the mail.

AACC Press Presents
Three New Releases...

Effects of Drugs on Clinical Laboratory Tests, Fourth Edition
by Donald S. Young

The fourth edition of this standard reference contains 7,954 more entries than the third edition. The directory features 38,955 drug-test interactions, data on 281 new drugs, and 351 more test results. The directory is organized in five sections: an index of laboratory tests; an index of search terms, mainly generic names for drugs; the two largest sections, which include listings of laboratory tests and drugs, and the final section, which cites references, by authors, title of article and journal. This update features 38% more journal and text references than the previous edition.

$149 (AACC Members $119)
ORDER #642

Biochemical Basis of Pediatric Disease, Second Edition
by Stephen J. Soldin, Nader Rifai and Jocelyn M. Hicks

The updated version of this reference provides a concise and valuable examination of why, where, when, and how much blood is required for a test. Doctors Soldin, Rifai and Hicks explain laboratory findings in patients with a variety of disorders which span a wide spectrum of diseases from disorders of porphyrin metabolism to disorders of the thyroid. This book contains all the important information that traditional textbooks of pediatrics occasionally omit. Similar to the first edition, it is designed to assist both clinicians and investigators in selecting the appropriate diagnostic tests for their patients.

$69 (AACC Members $55)
ORDER # 641

Handbook of Workplace Drug Testing
by Ray H. Liu and Bruce A. Goldberger

This book presents a practical view of forensic science (a critical field of investigation) and a review of how testing for drugs of abuse developed. This handbook provides systematic, in-depth reviews addressing issues pertaining to analytical approach, specimen status, test result interpretation and legal considerations. Chapters are based upon review articles that were previously published in the Forensic Science Review. This reference book is intended primarily for clinical forensic toxicologists, but will be beneficial to all clinical laboratorians.

$49 (AACC Members $39)
ORDER #638

Order from: AACC Customer Service Department, 2101 L Street, NW, Suite 202, Washington, DC 20037-1526
Order by phone: call (202) 857-0717 or fax order to (202) 887-5093.
SYSTEM FEATURES

- Direct connection to your beta or gamma counter or plate reader
- Handles data from all assay types: RIA, IRMA, EIA, FIA, ELISA
- Can be configured to service up to 15 counters running simultaneously
- Built-in worklist system
- Results can be offloaded to other software systems (spreadsheet, database)
- Thorough user documentation in plain English
- OEM versions available
