

EDITORIALS

- Identifying Duplicate Publications: *Primum non Nocere*** N. Rifai, P.M. Bossuyt, and D.E. Bruns 777
- Homocysteine and Folate Status in an Era of Folic Acid Fortification: Balancing Benefits, Risks, and B-vitamins** P.M. Ueland and S. Hustad (see article on page 801) 779
- Estimating LDL ApoB: Infomania or Clinical Advance?** J.R. Burnett and G.F. Watts (see Brief Communication on page 907) 782

PERSPECTIVE

- Why a Cluster is Truly a Cluster: Insulin Resistance and Cardiovascular Disease** G. Reaven 785

REVIEW

- Laboratory Assessment of HDL Heterogeneity and Function** R. Movva and D.J. Rader 788

ARTICLES

LIPIDS, LIPOPROTEINS, AND CARDIOVASCULAR RISK FACTORS

- Trends in Circulating Concentrations of Total Homocysteine among US Adolescents and Adults: Findings from the 1991–1994 and 1999–2004 National Health and Nutrition Examination Surveys** C.M. Pfeiffer, J.D. Osterloh, J. Kennedy-Stephenson, M.F. Picciano, E.A. Yetley, J.I. Rader, and C.L. Johnson (see editorial on page 779) 801

- Tissue Factor and Monocyte Chemoattractant Protein-1 Expression in Hypertensive Individuals with Normal or Increased Carotid Intima-Media Wall Thickness** M.A. Sardo, S. Campo, G. Mandraffino, C. Saitta, A. Bonaiuto, M. Castaldo, M. Cinquegrani, G. Pizzimenti, and A. Saitta 814

MOLECULAR DIAGNOSTICS AND GENETICS

- Exon-Level Expression Profiling: A Comprehensive Transcriptome Analysis of Oral Fluids** Z. Hu, B.G. Zimmermann, H. Zhou, J. Wang, B.S. Henson, W. Yu, D. Elashoff, G. Krupp, and D.T. Wong 824

- Genetic Variants of Tumor Necrosis Factor Superfamily, Member 4 (*TNFSF4*), and Risk of Incident Atherothrombosis and Venous Thromboembolism** A. Mälarstig, P. Eriksson, L. Rose, K.A. Diehl, A. Hamsten, P.M. Ridker, and R.Y.L. Zee 833

- Association of Serum Interleukin-6 Concentration with a Functional *IL6* –6331T>C Polymorphism** A.J.P. Smith, F. D’Aiuto, J. Palmen, J.A. Cooper, J. Samuel, S. Thompson, J. Sanders, N. Donos, L. Nibali, D. Brull, P. Woo, and S.E. Humphries 841

- Association between the *UGT1A1* TA-Repeat Polymorphism and Bilirubin Concentration in Patients with Intermittent Claudication: Results from the CAVASIC Study** B. Rantner, B. Kollerits, M. Anderwald-Stadler, P. Klein-Weigel, I. Gruber, A. Gehringer, M. Haak, M. Schnapka-Köpf, G. Fraedrich, and F. Kronenberg 851

PROTEOMICS AND PROTEIN MARKERS

- Analysis of Circulating Forms of proBNP and NT-proBNP in Patients with Severe Heart Failure** A. Hammerer-Lercher, B. Halfinger, B. Sarg, J. Mair, B. Puschendorf, A. Griesmacher, N.A. Guzman, and H.H. Lindner 858

- Immunodetection of Glycosylated NT-proBNP Circulating in Human Blood** K.R. Seferian, N.N. Tamm, A.G. Semenov, A.A. Tolstaya, E.V. Koshkina, M.I. Krasnoselsky, A.B. Postnikov, D.V. Serebryanaya, F.S. Apple, M.M. Murakami, and A.G. Katrukha 866

- Development of a Multiplexed Urine Assay for Prostate Cancer Diagnosis** T. Vener, C. Derecho, J. Baden, H. Wang, Y. Rajpurohit, J. Skelton, J. Mehrotra, S. Varde, D. Chowdary, W. Stallings, B. Leibovich, H. Robin, A. Pelzer, G. Schäfer, M. Auprich, S. Mannweiler, P. Amersdorfer, and A. Mazumder 874

CLINICAL IMMUNOLOGY

- Screening Autoantibody Profiles in Systemic Rheumatic Disease with a Diagnostic Protein Microarray That Uses a Filtration-Assisted Nanodot Array Luminometric Immunoassay (NALIA)** J.D. McBride, F.G. Gabriel, J. Fordham, T. Kolind, G. Barcenas-Morales, D.A. Isenberg, M. Swana, P.J. Delves, T. Lund, I.A. Cree, and I.M. Roitt 883

AUTOMATION AND ANALYTICAL TECHNIQUES

- Microfluidic Leukocyte Isolation for Gene Expression Analysis in Critically Ill Hospitalized Patients** A. Russom, P. Sethu, D. Irimia, M.N. Mindrinos, S.E. Calvano, I. Garcia, C. Finnerty, C. Tannahill, A. Abouhamze, J. Wilhelmy, M.C. López, H.V. Baker, D.N. Herndon, S.F. Lowry, R.V. Maier, R.W. Davis, L.L. Moldawer, R.G. Tompkins, M. Toner, and the Inflammation and Host Response to Injury Large Scale Collaborative Research Program 891

continued

ARTICLES, *continued*

- Rapid HPLC Measurement of Thiamine and Its Phosphate Esters in Whole Blood J. Lu and E.L. Frank 901

BRIEF COMMUNICATIONS

- Estimation of LDL-Associated Apolipoprotein B from Measurements of Triglycerides and Total Apolipoprotein B A.M. Baca and G.R. Warnick (see editorial on page 782) 907

- A Simple Assay to Measure Phagocytosis of Live Bacteria H. Bicker, C. Höflich, K. Wolk, K. Vogt, H.-D. Volk, and R. Sabat 911

- Photoinstability of S-Nitrosothiols during Sampling of Whole Blood: A Likely Source of Error and Variability in S-Nitrosothiol Measurements Y. Wu, F. Zhang, Y. Wang, M. Krishnamoorthy, P. Roy-Chaudhury, B.E. Bleske, and M.E. Meyerhoff 916

- Automated Time-Resolved Immunofluorometric Assay for Progastrin-Releasing Peptide M.S. Nordlund, D.J. Warren, K. Nustad, J. Bjerner, and E. Paus 919

CITATION CLASSIC

- High-Density Lipoproteins: The Neglected Stepchildren Whose Importance as a Risk Factor Continues to Be Defined G.R. Warnick 923

LETTERS TO THE EDITOR

- Agreement of Different Immunoassays for Urinary Albumin Measurement J.L. Camargo, G.M. Lara, A.E. Wendland, J.L. Gross, and M.J. de Azevedo 925

- Influence of Thyroid Hormone Autoantibodies on 7 Thyroid Hormone Assays S.A. Zouwail, A.M. O'Toole, P.M.S. Clark, and J.P. Begley 927

- Analytical Quality of Calcitonin Determination and Its Effect on the Adequacy of Screening for Medullary Carcinoma of the Thyroid E. Cavalier, A. Carlisi, J.-P. Chapelle, and P. Delanaye 929

- Stabilization of Glucose in Blood Specimens: Mechanism of Delay in Fluoride Inhibition of Glycolysis L.M. Mikesh and D.E. Bruns 930

- Variability of Lipoprotein-Associated Phospholipase A2 Measurements J.P. McConnell and A.S. Jaffe 932

- Effect of Plasma Protein Depletion on BNP-32 Recovery A.M. Hawkrigde, D.C. Muddiman, D.M. Heublein, A. Cataliotti, and J.C. Burnett, Jr. 933

BOOKSHELF

- Microchip-Based Assay Systems: Methods and Applications. Pierre N. Floriano, Editor. L.J. Kricka 935

ACCENT®—CONTINUING EDUCATION CREDIT FOR READERS OF CLINICAL CHEMISTRY

For more information go to <http://apps.aacc.org/ccj/accent>

ON THE COVER This illustration depicts an HDL particle. Although HDL has been studied for decades, many important questions still remain. Will therapy to increase HDL-C and apo AI concentrations be protective against cardiovascular events? Should we continue to focus on measuring HDL-C

and apo AI concentrations, or also include the determination of HDL subfractions? Will functional measures of HDL activity relating to macrophage cholesterol efflux and reverse cholesterol transport, anti-inflammatory roles, and nitric-oxide promotion better reflect its cardiovascular protective effects? See Review by Movva and Rader on page 788 and Citation Classic by Warnick on page 923. The illustration is provided courtesy of Dr. Rader and reproduced with permission.

Color figures for Reviews sponsored by Department of Laboratory Medicine, Children's Hospital Boston.

CALL FOR ART

The all-new design of *Clinical Chemistry* will now feature a different graphic on the cover each issue. Authors with dynamic graphics should indicate interest in their cover letter upon manuscript submission. Readers are also encouraged to submit dynamic graphics via e-mail at clinchemed@clinchem.aacc.org
