New BD™ P100 Blood Collection System
Setting the Standard in Plasma Proteomics

BD™ P100 enables greater recovery and preservation of plasma proteins:

On-board stabilizers provide immediate protection, and an innovative mechanical separator* minimizes cellular contamination.

Ideal for clinical research, drug discovery, and diagnostic assay development.

* Patented

For Research Use Only - Not for Use in Diagnostic Procedures

Information for Authors

Clinical Chemistry is published by the American Association for Clinical Chemistry (AACC). The journal welcomes contributions of original information, experimental or theoretical, that advance the science of clinical chemistry. Submissions should adhere to the “Uniform Requirements for Manuscripts Submitted to Biomedical Journals” (N Engl J Med 1991;324:424–8).

Manuscript Review. Manuscripts are evaluated by anonymous peer reviewers. Authors are usually notified of the disposition of a manuscript within three to four weeks of its receipt. Equal consideration is given to manuscripts in English from any country, whether or not the author is a member of the AACC.

Copyright. Manuscripts are considered with the understanding that each author has participated in the work and assumes responsibility for the content; that the authors have disclosed any potential conflicts of interest; that the same information has not been and will not be submitted for concurrent review; nor published elsewhere (other than as an abstract, preliminary report, or poster cited in the manuscript); that unique materials necessary to reproduce the results are available to readers; and that if the manuscript is accepted, copyright will be transferred to the publisher. To convey these assurances, all authors must sign the copyright form provided at acceptance.

Unpublished Work. When citing unpublished work or opinions of others, provide a permission letter from them.

Manuscript Preparation. Text: Most common word-processing software formats are accepted; Microsoft Word is preferred. Use 12-point font, 1-inch margins, and double spacing throughout. Do not use headers or footers, but do number the pages, starting with the title page as page 1. For guidance on manuscript preparation and style, consult our Information for Authors at http://www.clinchem.org/info_ar/info_a_outline.shtml.

Images: The acceptable image file formats for print publication are TIFF (tagged image file format) and EPS (encapsulated postscript) both at 600 dpi resolution. The figures must be submitted as independent files, not embedded within a word processing document. Microsoft PowerPoint (PPT) files are also acceptable, but each file must have embedded fonts and only one image per slide, one slide per file. Verify that symbols and lettering will be legible when reduced to publication size. Figures should be redesigned or recreated if they do not appear sharp and clear on paper. Authors are advised to use our online Digital Expert evaluation tool to test print figures before submitting them.

The author will be required to bear the full cost of the preparation and publication of color illustrations, invited contributions excepted. The charge for the first color figure is $1500. Subsequent color figures or parts of figures are $500 each. The author will be required to bear the full cost of the preparation and publication of color illustrations, invited contributions excepted. The charge for the first color figure is $1500. Subsequent color figures or parts of figures are $500 each.

The complete Information for Authors is available at http://www.clinchem.org/info_ar/info_a_outline.shtml.

Clinical Chemistry (ISSN 0009-9147) is published monthly by the American Association for Clinical Chemistry, 1850 K Street, NW, Suite 625, Washington, DC 20006.

© 2009 The American Association for Clinical Chemistry

Editorial Office Address. For additional information about manuscript submission and reviewing, contact the editorial office. Telephone 202.420.7678; fax 202.833.4576; email clinchemed@aacc.org. Address for regular mail or courier: Clinical Chemistry, 1850 K Street, NW, Suite 625, Washington, DC 20006.

Subscriptions: Contact the AACC Subscriptions Department at 1850 K Street, NW, Suite 625, Washington, DC 20006. Telephone 800.892.1400 or 202.857.0717; fax 202.887.5093; or Web sites http://www.clinchem.org or http://www.aacc.org. Annual 2009 rates: Print and online institutional subscription USA $1,061, elsewhere $1,224. Individual subscription USA $520, elsewhere $496. Airmail delivery outside USA is an additional $290. Online only (no print) institutional subscription $717; individual subscription $217. Individual subscriptions are for personal use and not to be used in a library.

Reprints: Reprint order forms are mailed to authors with their page proofs. Reprints can also be ordered at any time by contacting the Cadmus Reprint Department. Telephone 800.407.9190 or 410.819.3967; fax 410.820.9765. Minimum reprint order is 100 copies.

Back Issues: Selected complete back volumes and single copies of current and back issues are available from AACC. Contact the Subscription Department for pricing.

Missing Copies: Claims will not be allowed (a) unless we are notified within 3 months after the issue date for domestic and Canadian subscribers, or 6 months after the issue date for foreign subscribers; (b) if notice of a recent change of address has not been received; or (c) if the reason for claim is ‘missing from files’. For claims to be processed, the subscriber’s number and exact name and address as they appear on the mailing label must be included in correspondence.

Abstracting and Indexing Services: Clinical Chemistry is covered by Abstracts Express, Analytical Abstracts, Biological Abstracts, BIOSIS, Chemical Abstracts Service, Current Awareness in Biological Sciences, Current Clinical Cancer, Current Contents/Life Sciences, Excerpta Medica/EMBASE, Index Medicus, MEDLINE, Reference Update, Research Alert, Science Citation Index, Sociedad Iberoamericana de Información Científica (SIIC) Data Bases, and Scisearch.

Disclaimers: Manuscripts published in Clinical Chemistry reflect the individual views of their authors and, in the absence of a statement to the contrary, not the views of the institutions with which the authors are affiliated. The contents of advertisements or articles are not to be construed as official statements, evaluations, or endorsements by the Editor or the American Association for Clinical Chemistry.

Advertising Inquiries: Contact Scherago International, Inc., 525 Washington Blvd., Suite 3310, Jersey City, NJ 07310. Telephone 201.653.4777; fax 201.653.5205; e-mail aacc@scherago.com; Internet http://www.scherago.com.

**Manuscript Formatting**
- Double-spaced text, 1 inch margin, twelve-point font size in Arial, Helvetica or Times New Roman
- Numbered pages
- Title page listing title, authors (first name, middle initial, last name), each author’s affiliation during the study, corresponding author’s contact information, running title, keywords, list of any previous presentation of manuscript, and any disclaimers
- Number references sequentially in main text
- Reference list formatted according to Information for Authors
- Accuracy of journal abbreviations in the reference list checked against the National Center for Biotechnology Information database (http://www.ncbi.nlm.nih.gov/)
- SI Units used throughout manuscript according to Information for Authors

**Metadata (to be entered online)**
- A valid and unique e-mail for each author
- Authors’ current institutions, address, telephone, and fax
- Forms to be completed online
  - Author Disclosure Forms
  - Author Contribution Forms
  - Copyright Transfer Agreement
- Have available the number of references, tables, figures, and supplemental data files
- *Clinical Chemistry* manuscript number of any companion papers (if applicable)

**Compliance with Guidelines**
- A STARD checklist is required for all studies or trials of the diagnostic accuracy or performance of a diagnostic test, a CONSORT diagram is required for all randomized and Phase III trials, a MIAME checklist is required for all studies that present data for microarray experiments.
- All studies involving human subjects must indicate that they are in compliance with the Declaration of Helsinki ethical principles for medical research involving human subjects.
  A statement must be included in the text that Institutional Review Board approval was obtained and written informed consent obtained from study subjects.

**Permissions**
- Copyright forms to be supplied by each author upon acceptance prior to publication
- Written permission from the copyright holder is required to reproduce any copyrighted material
Our new advances in VITROS® technology are driven by your impact on patients.
Quality lab results touch lives. Millions of them, every day. That’s the global magnitude of what you do—and the reason why Ortho Clinical Diagnostics supports you with innovative systems that help you do it better than ever. To make your lab more productive without compromising quality results, we studied laboratories around the world and created two new high-capacity VITROS® systems.

As the next generation in our standardized family of systems, the VITROS® 5600 Integrated System and the VITROS® 3600 Immunodiagnostic System feature patented enabling technologies, innovative sample handling, and a world-class menu for exceptional accuracy, efficiency, and result integrity. We’re committed to shaping the future of diagnostics, because what you do shapes the future of countless lives around the world. Learn more at www.orthoclinical.com.

The science of knowing shapes the art of living.

Clinical Analyzers that provide Time savings, Cost savings and increase your test Menu

The FXimola™ and FXdaytona™ are fully automated clinical chemistry analyzers with a wide test menu, high throughput, integrated ISE units, an easy to use interface, low consumables and many labour saving features such as primary cup sampling, bar-coded reagents, auto start-up, over 500 pre-programmed tests...

The FXmonza™ is a semi-automated clinical analyzer offering all the benefits of the RX series on a smaller scale.

THE TEST MENU INCLUDES:
- Routine clinical chemistry
- Trace metals
- Lipids
- Veterinary parameters
- Enzymes
- Food and wine testing
- Therapeutic drugs
- Open channel methods
- Special chemistry
- New tests, for example sLDL for improved cardiovascular risk assessment
- Proteins
- Antioxidants

CALL FOR ABSTRACTS

Deadline: February 1, 2010

42nd Annual

OAK RIDGE CONFERENCE
Tomorrow's Technology Today

Capturing Innovation
The Impact on Emerging Diagnostic Technologies

Thursday & Friday, April 22 & 23, 2010
San José, Calif.

All abstracts on emerging technology for clinical diagnostics are welcome!

$500 Outstanding Poster Award

You can be a part of this highly regarded conference by submitting an abstract for the poster session. The conference committee will select abstracts for brief oral presentations.

Keynote Presentation

Nanotechnology at the Frontier of Individualized Medicine

Mauro Ferrari, PhD
Division of NanoMedicine, Department of Biomedical Engineering
University of Texas Houston

Dr. Ferrari is an internationally recognized expert in the development and application of biomedical nanotechnology. He has received many national and international awards, including the Wallace H. Coulter Award for Innovation and Entrepreneurship in 1999. From 2003 to 2005, he served as special expert on nanotechnology and eminent scholar at the NIH, where he led in the development of NCI’s program in nanotechnology, the largest program in nanomedicine in the world today.

Four Sessions

- Diagnostic technologies for resource-limited settings
- Novel multiplex platforms for diagnostics
- Emerging detection technologies for diagnostics
- Novel separation and sample prep technologies

For more information and to submit an abstract, go to: www.aacc.org/events/

AACC
Improving healthcare through laboratory medicine

American Association for Clinical Chemistry, Inc.
1850 K Street, NW, Suite 625, Washington, DC 20006

Attendees rate this the best poster session for emerging diagnostic technologies.
**Accurately Assess a Person’s Risk of Cardiovascular Disease**

The Lipid Profile from Randox is a group of tests comprising:

- Apolipoproteins
- HDL cholesterol
- LDL cholesterol
- Lipoprotein (a)
- Small dense LDL cholesterol
- Total cholesterol
- Triglycerides

A complete profile of tests provides greater information than one performed in isolation.

Randox Lipid Profile is all you need to investigate cholesterol levels and provide an accurate and reliable diagnosis.

The Scientific Expert in Court, 2nd Ed.

Richard C. Froede and Haskell M. Pitluck

2009, 87 pages, softcover
ISBN 9781594250941
Product # 5646
Price only $35; AACC Member $29

The newly revised edition of The Scientific Expert in Court will help you:
- respond to a subpoena
- prepare for an interview, affidavit, deposition, or trial
- be a successful witness

Included in this edition are:
- an example of a subpoena
- checklists for trial preparation and billing
- a glossary of common legal terms

Chapters have been rewritten to reflect changes in courtroom rules and procedures, and the Frye v. US decision, which controlled admissibility of evidence for many years, has been added as an appendix. The Daubert decision and succeeding cases, which apply in Federal and many state courts, are also discussed. The novice expert witness will find this guidebook an excellent introduction to trial preparation and courtroom testimony.

Quick Guide to Coagulation Testing, 2nd Ed.

Marisa B. Marques and George A. Fritsma

2009, ~105 pages, spiral binding
ISBN 9781594250958
Product # 5644

Price only $20; AACC Member $16

The Quick Guide to Coagulation Testing, Second Edition, is a quick-access, readily available pocket reference for health practitioners who order, collect, perform, or interpret hemostasis laboratory test results or administer hemostasis-related therapy.

The Guide outlines the most common hemorrhagic and thrombotic conditions together with their respective assays to emphasize correct laboratory evaluation. Treatment discussions include the prophylactic and therapeutic application of non-biological, synthetic, and human blood-derived components to control bleeding, and the use of antithrombotics designed to prevent or resolve arterial and venous occlusions. The emphasis is on proper dosing and valid laboratory monitoring of hemostatic therapy.

New to the second edition is a series of introductory-reference tables summarizing hemostasis assays for various conditions with their reference intervals, and when applicable, therapeutic ranges. The discussion of platelet and coagulation physiology is expanded, platelet function testing is detailed, and new antithrombotic therapies are described with therapeutic monitoring recommendations. All portions of the second edition have been enhanced to reflect current international practice standards.

Critical Issues in Alcohol and Drugs of Abuse Testing

Edited by Amitava Dasgupta

2009, 319 pages, softcover
ISBN 9781594250934
Product # 5629

Price only $90; AACC Member $75

Critical Issues in Alcohol and Drugs of Abuse Testing addresses problems encountered in workplace alcohol and drug testing and how to resolve such problems. People try to pass drug tests by using a variety of urinary adulterants, and this book reviews, in detail, how to catch these cheaters. Ingestion of certain prescription medications or poppy seed-containing food, however, may also cause positive results in drug testing. Two chapters are devoted to reviewing true analytical positive results in drugs of abuse testing. In addition, drug testing using alternative specimens such as hair, saliva, and sweat is also addressed. Additional chapters review the following:

- Pharmacogenomics of alcohol abuse
- Pharmacogenomics of drugs of abuse
- Abuse of magic mushrooms, peyote cactus, khat, and volatiles
- Sports drug testing

Critical Issues in Alcohol and Drugs of Abuse Testing will be helpful to toxicologists, medical review officers, pathologists, and medical technologists as a quick handbook and reference book to address problems encountered in alcohol and drugs of abuse testing.

Applying Evidence-Based Laboratory Medicine: A Step-by-Step Guide

Christopher P. Price, Joanne Lozar Glenn, and Robert H. Christenson

Published 2009, 270 pages, softcover, ISBN 9781594250897, Product #5175

Price only $70; AACC Member $58

This workbook offers a step-by-step guide to applying the principles of evidence-based laboratory medicine (EBLM) in routine practice.

The term "evidence-based" is increasingly becoming part of the language in the practice of clinical medicine, and in laboratory medicine. In laboratory medicine, it is also becoming clear that the "evidence" differs somewhat from that on which the specialty was founded. The foundation of laboratory medicine is an understanding of the molecular mechanisms that describe the pathology of disease, but in applying this knowledge to patient care, the emphasis moves from understanding disease mechanisms to improving health outcomes.

By applying EBLM to daily practice, laboratory professionals can
• Ensure appropriate use of tests at the requesting, decision-making, and application phases.
• Make the business case for implementing new diagnostic tools and strategies that meet clinical needs.
• Become full members of the clinical team and take an important role in implementing change.

The key is understanding the question being asked—and then applying the EBLM A5 Cycle: Ask, Acquire, Appraise, Apply, Assess.

This workbook walks readers through this process by providing a wide range of case studies that illustrate applications of EBLM in routine laboratory practice. Readers are then encouraged to record their own examples, consider how they might be addressed using the principles of EBLM, formulate research questions, and then follow those questions to their evidence-based solutions.

Throughout the text, sidebars and exercises offer additional helpful information and highlight key concepts. Whether used alone or with colleagues, this workbook provides the knowledge and practice that will give readers confidence that they are indeed learning how to apply the best available scientific evidence to diagnostic challenges, and in the process, playing a central role in patient care.
