Regarding REGARDS: Does Inflammation Explain Racial and Regional Differences in Cardiovascular Disease Risk? N.R. Cook and M.A. Albert

Heavy/Light-Chain Analysis of Monoclonal Gammopathies D.F. Keren

PERSPECTIVES

Assessment of Kidney Function for Drug Dosing A.S. Narva

SPECIAL REPORT

ARTICLES

LIPIDS, LIPOPROTEINS, AND CARDIOVASCULAR RISK FACTORS

Implications of Increased C-Reactive Protein for Cardiovascular Risk Stratification in Black and White Men and Women in the US M. Cushman, L.A. McClure, V.J. Howard, N.S. Jenny, S.G. Lakoski, and G. Howard

CANCER DIAGNOSTICS

Clinical Significance and Prognostic Value of Serum Dickkopf-1 Concentrations in Patients with Lung Cancer S.L. Sheng, G. Huang, B. Yu, and W.X. Qin

ENDOCRINOLOGY AND METABOLISM

MOLECULAR DIAGNOSTICS AND GENETICS

Copy-Number Variation Genotyping of GSTT1 and GSTM1 Gene Deletions by Real-Time PCR M.J. Rose-Zerilli, S.J. Barton, A.J. Henderson, S.O. Shaheen, and J.W. Holloway

Aptamer-Based Regionally Protected PCR for Protein Detection J.S. Lin and K.P. McNatty

Nonfluorescent Denaturing HPLC–Based Primer-Extension Method for Allele-Specific Expression: Application to Analysis of Mismatch Repair Genes G.M. Aceto, L. De Lellis, T. Catalano, S. Veschi, P. Radice, A. Di Iorio, R. Mariani-Costantini, A. Cama, and M.C. Curia

ON THE COVER  
Carl Wittwer.  
What do the Gormenghast Castle, pantomime, Federico Fellini, and potatoes have to do with the development of real-time PCR and the LightCycler instrument? To find out, read this month’s Inspiring Minds feature about the scientist who turned polymerase chain reaction (PCR), a mainstay of molecular biological research, from a laborious and time-consuming task into a quick and easy method. See page 1744. ©Reproduced with permission. Artist, Martin A. Knapp.
