ON THE COVER Graham Beastall. Could this man have been one of the original Beatles? Possibly. A native of Liverpool, Beastall went to high school with Paul McCartney and George Harrison. Fortunately for us, John Steinbeck's *Of Mice and Men* had an impact

on his life. How did he end up in the field of clinical chemistry? What drives him? To find out, read this month's Inspiring Minds feature about the scientist and IFCC president who makes his way each weekend to 1 of Glasgow's toughest neighborhoods to attend to the well-being of the youth in a housing project.
