**On the Cover**

Peter Wilding. A true British gentleman, impeccable dresser and master storyteller, Peter Wilding grew up during the Great Depression and on the brink of World War II. Wilding’s association with clinical chemistry began at age 17, when he dropped out of school to work as a medical technician to help his widowed mother financially. He is still active in the field some 60 years later, having gone from academics to industry and back and forth again, as well as between England and America. Although it might appear that he has been blown by the winds of fate, in truth, Wilding has a knack for creating opportunity. Readers can learn more about him in our latest Inspiring Minds article in this issue of Clinical Chemistry. (See page 1368.) ©Reproduced with permission. Artist, Martin A. Knapp.
