Register Your Lab and Save
Enroll four or more learners from your organization in a Certificate Program and use the AACC member rate. Offer requires group enrollment at one time over the phone.
Call AACC Customer Service at 800.892.1400 or 202.857.0717 to enroll.

LABORATORY MANAGEMENT
Basic Principles and Architecture of Laboratory Information Systems
Terminology, middleware, security, managing an LIS setup, and other topics
Clinical Laboratory Leadership and Management
Leadership skills, tools for managing time, personnel, and team development
Laboratory Operational Management (NEW)
Rapid change management projects, testing quality oversight, process improvement initiatives, and operational costs
Patient Safety Essentials for Laboratory Professionals
Dealing with personnel issues, lab errors, identifying risk, and improving quality as a team
Practical Approaches to Quality Control in the Clinical Laboratory
How to assess test performance, measuring QC samples, reviewing QC data, failures, and proficiency testing
Support for this program provided by BIO-RAD
Regulatory Affairs for Laboratory Compliance
Key regulations, state and private regulatory oversight, resources for compliance, fraud and abuse provisions, reimbursement, and FDA regulation of diagnostic testing
Statistical Methods for Clinical Laboratorians
Statistical distributions, correlation and tests for linearity, method validation, and quality control tests

LABORATORY TESTING
Fundamentals of Molecular Pathology
Lab techniques, genetics, infectious diseases, and hematopathology among other topics
Support for this program provided by ROCHE
Principles of Clinical Toxicology
Screening for drugs of abuse, specimens for testing, and chromatography usage
Support for this program provided by Waters
Point-of-Care Specialist
Program administration, instrument selection, connectivity, training, communication, and more
Improving Outcomes Through Point-of-Care Testing
The next step in POC education with lectures on optimizing testing in emergency and disaster medicine
Support for Point-of-Care programs provided by Abbott

LABORATORY TECHNOLOGY
Basic Concepts and Clinical Applications of Flow Cytometry
Protocols, and quality assurance methods. Lectures in various areas such as immunophenotyping, diagnosis of immunodeficiencies, and transplantation
Using Tandem Mass Spectrometry in the Clinical Laboratory
Mass spectrometry and chromatography, including validation, lab setup, maintenance and troubleshooting
Support for this program provided by Agilent Technologies

Online Certificate Programs in 3 complementary areas of lab medicine
- Get online access to lectures, readings, quizzes, and peer discussions.
- Earn 8-13 CE credits.

To enroll by phone, call AACC Customer Service at 800.892.1400 or 202.857.0717.
25 Years of Excellence in Clinical Diagnostics

Our LC-MS/MS Portfolio:

- Steroids
- Therapeutic Drug Monitoring
- 25-OH-Vitamin D₃/D₂ – Osteoporosis Diagnosis
- Newborn Screening
- Biogenic Amines
- Vitamin Profiling
- Biomarker for Alcohol Abuse

Some of these products are not available in the USA.
Enabling laboratories to accurately identify and quantitate drugs and endogenous biomarkers using LC-MS/MS.

Cerilliant Certified Spiking Solutions® – critical materials for use in calibrators, controls, and isotope dilution.

Cerilliant – when results matter.
DESIGNING and WRITING
Scientific Research Papers
Based on the Clinical Chemistry Guide to Scientific Writing

Thomas M. Annesley

AACC Better health through laboratory medicine.
Illicit drug chemists have been modifying structures of abused drugs to circumvent legal restrictions and evade detection. The novel compounds they create have been given the moniker “designer drugs.” The Quick Guide to Designer Drugs reviews the major classes of abused drugs where this phenomenon has been occurring. Included are discussions of designer cathinones (bath salts), synthetic cannabinoids (spice, K2), and designer phenethylamines and tryptamines, as well as analogs of benzodiazepines, ketamine, opioids, and phencyclidine. Specific sections are devoted to the designer cathinones and synthetic cannabinoids because of their popularity for use and abuse. Data from postmortem cases and drugged driving cases are summarized, as are results from in vivo and in vitro metabolism studies in the scientific literature.
Share your vision for the future of laboratory medicine. With more than 18,000 attendees, the AACC Annual Meeting & Clinical Lab Expo is the ideal venue to present your research results.

Submit your abstract for consideration to be:
• Presented as a poster at the 2016 Annual Meeting in Philadelphia. Several recognized abstracts will also be selected for podium presentations.
• Published in the October 2016 supplement to Clinical Chemistry.
• Considered for AACC Division and Student Awards.

For more information and to submit your abstract, visit www.aacc.org/2016am. The submission deadline is Thursday, February 25, 2016, 5:00 pm EST.
Are you experiencing quantitation frustration?

CIL products can help turn your frown upside down!

CIL manufactures internal standards with the highest chemical and isotopic purities commercially available, allowing you to focus on what really matters – improving patient care!

Advantages of Using Stable Isotopes for Clinical Mass Spectrometry

- Achieve absolute quantitation
- Improve accuracy and precision
- Reduce variation
- Improve method transferability
- Increase confidence

For more information, please contact CIL at 1-800-ISOTOPE, email cilsales@isotope.com, or visit us at isotope.com.

Enriching Scientific Discovery
An Expert’s Quick Guide to Diabetes Mellitus includes the basics of what laboratorians need to know about the pathophysiology, etiology, epidemiology, diagnosis, and clinical management of diabetes. Topics also include measuring glucose, managing diabetic crises, and the laboratory evaluation of the person with diabetes. This Guide complements the Quick Guide to Endocrinology that addressed the clinical presentation, pathophysiology, and laboratory testing of common endocrinologic problems.
July 31 through August 4, the 2016 AACC Annual Meeting & Clinical Lab Expo will welcome clinical laboratory visionaries to Philadelphia—a magnet of healthcare innovation. From cutting-edge technology to revolutionary education, come to immerse yourself in what’s now and what’s next.

Registration opens April 2016. Check for complete programming at www.aacc.org/2016am.
Competence in Stool Diagnostics

IDK Extract®

- fast ✔
- efficient ✔
- clean ✔

- Stool sample preparation totally relaxed
- Stool analytics with one buffer in a single extraction step for:

  - Calprotectin  
  - Pancreatic Elastase  
  - Hemoglobin  
  - Hemo-Haptoglobin-Complex  
  - EDN/EPX  
  - sIgA  
  - Albumin

  - Bile Acids
  - \( \alpha_1 \)-Antitrypsin
  - \( \beta \)-Defensin 2
  - Lactoferrin
  - anti-Transglutaminase Ab
  - anti-Gliadin Ab
  - Lysozyme
