

## EDITORIALS

**Predicting Asthma Exacerbations from a Drop of Blood** C. Ellervik and S. Mora (see article on page 823) **799**

**Cystatin C—Incremental Improvement in Measurement and Understanding of Results** G. Nordin (see article on page 833) **802**

## PERSPECTIVE

**Use of Multiparameter Tests for Identifying Women with Early Breast Cancer Who Do Not Need Adjuvant Chemotherapy** M.J. Duffy, E.W. McDermott, and J. Crown **804**

## Q&A

**Are We There Yet? Laboratory Preparedness for Emerging Infectious Diseases** Moderators: C.-A.D. Burnham and J.H. Kwon; Experts: E.M. Burd, S. Campbell, P.C. Iwen, and M.B. Miller **807**

## CLINICAL CASE STUDY

**Discrepant Results of Serum Creatinine and Cystatin C in a Urological Patient** K.G.E. van Roij, H.J.R. van der Horst, I. Hubeek, J.A.E. van Wijk, and A. Bökenkamp **812**

**Commentary** G.J. Schwartz **814**

**Commentary** S.C. Kazmierczak **815**

## REVIEW

 **The Human Long Interspersed Element-1 Retrotransposon: An Emerging Biomarker of Neoplasia** D. Ardeljan, M.S. Taylor, D.T. Ting, and K.H. Burns **816**

## ARTICLES

### EVIDENCE-BASED MEDICINE AND TEST UTILIZATION

 **Association of Blood Eosinophil and Blood Neutrophil Counts with Asthma Exacerbations in the Copenhagen General Population Study** S. Vedel-Krogh, S.F. Nielsen, P. Lange, J. Vestbo, and B.G. Nordestgaard (see editorial on page 799) **823**

## CURRENT ISSUES IN LABORATORY MEDICINE

**Multicenter Evaluation of Cystatin C Measurement after Assay Standardization** A.-S. Bargnoux, L. Piéroni, J.-P. Cristol, N. Kuster, P. Delanaye, M.-C. Carlier, S. Fellahi, A. Boutten, C. Lombard, A. González-Antuña, V. Delatour, and E. Cavalier on behalf of the Société Française de Biologie Clinique (SFBC) (see editorial on page 802) **833**

## AUTOMATION AND ANALYTICAL TECHNIQUES

**Liquid Chromatography-Tandem Mass Spectrometry Assay of Leukocyte Acid  $\alpha$ -Glucosidase for Post-Newborn Screening Evaluation of Pompe Disease** N. Lin, J. Huang, S. Violante, J.J. Orsini, M. Caggana, E.E. Hughes, C. Stevens, L. DiAntonio, H.C. Liao, X. Hong, F. Ghomashchi, A.B. Kumar, H. Zhou, R. Kornreich, M. Wasserstein, M.H. Gelb, and C. Yu **842**

## MOLECULAR DIAGNOSTICS AND GENETICS

**Closed-Tube PCR with Nested Serial Invasion Probe Visualization Using Gold Nanoparticles** J. Wang, B. Zou, Y. Ma, X. Ma, N. Sheng, J. Rui, Y. Shao, and G. Zhou **852**

**Noninvasive Prenatal Screening of Fetal Aneuploidy without Massively Parallel Sequencing** C. Xu, T. Wang, C. Liu, H. Li, X. Chen, H. Zhu, S. Chen, Q. Xin, J. Tao, L. Huang, and Z. Jiang **861**

## LIPIDS, LIPOPROTEINS, AND CARDIOVASCULAR RISK FACTORS

**Discordance between Circulating Atherogenic Cholesterol Mass and Lipoprotein Particle Concentration in Relation to Future Coronary Events in Women** P.R. Lawler, A.O. Akinkuolie, P.M. Ridker, A.D. Sniderman, J.E. Buring, R.J. Glynn, D.I. Chasman, and S. Mora **870**

## PROTEOMICS AND PROTEIN MARKERS

**Prognostic Role of Molecular Forms of B-Type Natriuretic Peptide in Acute Heart Failure** T. Suzuki, M.Z. Israr, L.M. Heaney, M. Takaoka, I.B. Squire, and L.L. Ng **880**

### PEARLS OF LABORATORY MEDICINE

*Clinical Chemistry* Trainee Council (CCTC) is a free online program for residents and fellows in laboratory medicine. The program provides a wealth of free educational materials and interactive tools, including Podcasts, Guide to Scientific Writing, Question Bank, Pearls of Laboratory Medicine, and much more. The Pearls are brief presentations on one key topic succinctly presented using slides, audio, and transcript supplements.

Join the CCTC today ([traineecouncil.org](http://traineecouncil.org)) for free access to the following Pearls of Laboratory Medicine. With nearly 100 Pearls now available, 1 is highlighted here.

**ON THE COVER** BIOHAZARD! Although people who work in laboratories are taught to respect this symbol and the warning it implies, the symbol did not exist until roughly 50 years ago. Noting the variety of warning symbols that were in use at that time, a confusing and dangerous situation, in 1966 Charles Baldwin of Dow Chemicals set out to create a bold universal symbol that had no up or down design and could be placed on a container in any direction and still be recognizable. After immediate acceptance by government agencies, this symbol became (and still is) the symbol for biohazard materials. Emerging infectious diseases represent one source of biohazard materials that laboratories must deal with. But are laboratories prepared? This month's issue of *Clinical Chemistry* contains a Q&A on the topic of laboratory preparedness, in which experts answer the question, "are we there yet?" (See page 807.) Reproduced with permission. ©Tim Vernon/Science Photo Library.

*Technology Corner*, podcasts, color figures for Reviews, and *Clinical Chemistry* Trainee Council sponsored by Department of Laboratory Medicine, Boston Children's Hospital.

Clinical Chemistry podcast coming soon to <http://www.clinchem.org>.

Individual articles may be selected to be a part of the Fast Track Program. Articles receive an expedited review, decision, and, if accepted, rapid online publication.
