PEARLS OF LABORATORY MEDICINE

Clinical Chemistry Trainee Council (CCTC) is a free online program for residents and fellows in laboratory medicine. The program provides a wealth of free educational materials and interactive tools, including Podcasts, Guide to Scientific Writing, Question Bank, Pearls of Laboratory Medicine, and much more. The Pearls are brief presentations on one key topic succinctly presented using slides, audio, and transcript supplements.

Join the CCTC today (traineecouncil.org) for free access to the following Pearls of Laboratory Medicine. With over 100 Pearls now available, 2 are highlighted here.

ON THE COVER Unconditional Surrender. On V-J (Victory over Japan) Day in 1945, photographer Alfred Eisenstaedt captured a historic Times Square photograph of a sailor stealing a kiss from the nearest girl, a nurse. Some 70 years later a statue of perhaps the most famous kiss of all time was installed along the Embarcadero—which in Spanish means “landing place”—of sunny San Diego. This July, San Diego will serve as the “landing place” for the thousands of attendees at the 2017 AACC Annual Scientific Meeting & Clinical Lab Expo. Among the many available scientific sessions, renowned plenary speakers will share their knowledge of the CRISPR technology, oncofertility, genomics, antibiotic resistance, and the care for substance use disorders. There will also be a presentation by innovators of the Qualcomm Tricorder Xprize. Of course, if you want to take a break from the activities at the meeting, you can always take a short walk down to the Embarcadero and watch lovers reenact that famous 1945 kiss. ©Flickr/Jenny Baxter.
