PEARLS OF LABORATORY MEDICINE

Clinical Chemistry Trainee Council (CCTC) is a free, multilingual, online program for residents and fellows in laboratory medicine. The program provides a wealth of free educational materials and interactive tools, including Podcasts, Guide to Scientific Writing, Question Bank, Pearls of Laboratory Medicine, and much more. The Pearls are brief presentations on one key topic succinctly presented using slides, audio, and transcript supplements.

Join the CCTC today (traineecouncil.org) for free access to the following Pearls of Laboratory Medicine. With over 100 Pearls now available, 2 are highlighted here.

Dustin Strasburg
 Enumeration of CD34 Stem Cells by Flow Cytometry

ON THE COVER AACC Learning Lab authors. The AACC Learning Lab for Laboratory Medicine on NEJM Knowledge+ is currently considered the most ambitious cloud-based medical education program in the world. Over 90 laboratory medicine physicians and scientists from around the globe have volunteered their time to author courses for this initiative. In recognition of their efforts and in appreciation for their commitment to this program, *Clinical Chemistry* wishes to honor the authors by displaying their photos on the cover of this issue and by highlighting this program and the authors' contributions to it in an editorial (see page 1679).
