### PEARLS OF LABORATORY MEDICINE

*Clinical Chemistry* Trainee Council (CCTC) is a free online program for residents and fellows in laboratory medicine. The program provides a wealth of free educational materials and interactive tools, including Podcasts, Guide to Scientific Writing, Question Bank, Pearls of Laboratory Medicine, and much more. The Pearls are brief presentations on one key topic succinctly presented using slides, audio, and transcript supplements.

Join the CCTC today ([traineecouncil.org](http://traineecouncil.org)) for free access to the following Pearls of Laboratory Medicine. With over 100 Pearls now available, 2 are highlighted here.

Shabnam Zarei  
Hereditary Endometrial Carcinoma (With a Focus on Lynch Syndrome)

### ON THE COVER Matthew McQueen.

A gentle Scotsman, McQueen initially made his mark as an accomplished debater who won the most coveted prize in all of British debating. Through debating, McQueen saw in himself abilities he did not know he had. After finishing his medical degree, he decided to pursue a PhD while working full time in the clinic. His research overturned assumptions about how cardiac enzymes could be measured. A continuously energetic man who gave up his clinical work in 2014, he still directs the Clinical Trial Research Laboratory and Biobank at Hamilton General Hospital. If that is not enough, he wrote a master's thesis in history in 2015. Matt McQueen has the tendency to attribute his accomplishments to serendipity. But anyone who reads this month's *Inspiring Minds* feature will see that there is much more to the life of this man than serendipity. (See page 624.) © Reproduced with permission. Artist, Martin A. Knapp.
