**PEARLS OF LABORATORY MEDICINE**

Clinical Chemistry Trainee Council (CCTC) is a free online program for residents and fellows in laboratory medicine. The program provides a wealth of free educational materials and interactive tools, including Podcasts, Guide to Scientific Writing, Question Bank, Pearls of Laboratory Medicine, and much more. The Pearls are brief presentations on one key topic succinctly presented using slides, audio, and transcript supplements.

Join the CCTC today ([traineecouncil.org](http://traineecouncil.org)) for free access to the following Pearls of Laboratory Medicine. With over 100 Pearls now available, 2 are highlighted here.

Teresa Scordino

**ON THE COVER** Allan Jaffe. Although he is known as a world authority on the use of cardiac biomarkers, in particular troponin, Allan Jaffe is inspiring not only because of his successes but also because of his resilience in overcoming challenges in his life. His gravelly voice hides an individual whose internal voice is actually a soft one that reflects a passion for helping others, especially young people. For example, during his first year in medical school, he signed up with the Big Brother Foundation and was paired with a fatherless boy with whom he met weekly for the next four busy years. Who got the most direction in life from the experience? You will have to read this month's Inspiring Minds article to decide for yourself. (See page 1275.) ©Reproduced with permission.
