Contents

FEBRUARY

Optimal Conditions for the Enzymatic Determination of L-Lactic Acid

G. F. Olson 1

Lactic Dehydrogenase in the Serum of Newborn Infants with Jaundice

Augusta B. McCoo, Dorothy H. Jameson, and Viola R. Daugherty 11

X-Ray Spectroscopy in the Clinical Laboratory: VI. Acid-labile protein-bound iodine

Samuel Natelson and Bertram Sheid 17

Interference-free Flame Photometry of Calcium in Serum and Urine

Ralph E. Thiers and Kirsten Hriid 35

A Comparison of Methods for Determining Catechol Amines and 3-Methoxy-4-hydroxymandelic Acid in Urine

D. J. Mahler and F. L. Humoller 47

Eugene T. Re, and John W. Loftis 56

An Evaluation of Serum “Trypsin” Tests

Arthur L. Babson, Prunella A. Read Williams, and George E. Phillips 62

Absorption Measurements for Oxygenated and Reduced Hemoglobin in the Range 0.6-1.88 Mierss

Robert B. Barlow, Jr., and Michael L. Polanyi 67

Continuous In-Vivo Estimation of Blood Alcohol: With special reference to its application to the study of alcohol metabolism

Guy Nadeau, Renoit Fortin, and Pierre Dugal 72

A Graphic Prothrombin Time Recorder with Air Bath

Robert Houston Hamilton 80

An Equilibrating Device for Use in Conjunction with the Automatic Determination of Carbon Dioxide-Combining Power

Roger W. Marsters 91

The Clinical Chemist

Evaluation of a Kit for Protein-Bound Iodine Analyses: Report of a subcommittee of the Committee on Standards of the AACC

Arnold G. Ware, Vincent J. Pileggi, Gerard F. Lanchantin, and Albert L. Chaney 97

A Clinical Chemist Looks Behind the Iron Curtain

Miriam Reiner 101

Fourteenth Annual Meeting of AACC 103

APRIL

An Ultramicro Method for the Estimation of Plasma Cholesterol

G. S. Duboff and W. W. Stevenson 105

Serum Amylase Determination by Somogyi’s Amyloclastic Method with Use of a Photometric End Point

Arnold E. Reif and Donald C. Nabseth 113

Modified Reagents for Determination of Urea and Ammonia

Albert L. Chaney and Edward P. Marbach 130

Serum Adenosine Deaminase: Methodology and Clinical Applications

Leonore Holland Koehler and Edward J. Benz 133

Devina C. Tweed and E. Perry McCullagh 141
New Method for the Determination of Whole-Blood Iron and Hemoglobin

Harold V. Connerty and Anglis R. Briggs

New Refractometric Methods for the Determination of Total Proteins in Serum and in Urine

A. V. Wolf, John B. Fuller, E. J. Goldman, and T. D. Mahony

Micro Immunochemical Method for Estimating High- and Low-Density Lipoproteins

R. L. Searcy, V. P. Carroll, Jr., J. S. Carlucci, and L. M. Bergquist

Use of Micromethod for Phenylalanine in Management of Phenylketonuria Patients

Helen Berry

The Use of Ion-Free Serum as a Standard in Clinical Chemistry

Arthur L. Levy

1960 Survey of Clinical Chemistry Procedures used by Members of the American Association of Clinical Chemists

Eugene W. Rice and Betty S. Grogan

Scientific Notes

194

Letters to the Editor

201

The Clinical Chemist

203

JUNE

An o-Toluidine Method for Body-Fluid Glucose Determination

Kurt M. Dubowski

Photometric Determination of Cerebrospinal Fluid Total Globulin and A/G Ratio with a Tryptophan Reaction

Abraham Saifer and Shirley Gerstenfeld

Microbiological Test for Leucine, Valine, and Isoleucine Using Urine Sample Dried on Filter Paper

Helen K. Berry, Carolyn Schell, and Joy Marks

The Osmotic Pressure and Chemical Composition of Human Body Fluids

Edward B. Hendry

Paper Chromatographic Estimation of Phenylalanine and Tyrosine Using Fingertip Blood: Its application to phenylketonuria

Laboratory Tests in the Differential Diagnosis of Liver Disease: Report on two procedures

J. W. Keyser, R. B. Payne, and B. T. Stephens

Bilirubin Studies on the Serum of Newborn Infants

Miriam Reiner and Jack L. Thomas

A Method for the Fractionation and Quantitative Determination of the 17-Oxosteroids of Urine

David J. Watson and Paige K. Beach

Determination of Galactose in Blood

Margaret Smith and Lloyd E. Thomas

Observations on the Zak Cholesterol Reaction: Glacial Acetic Acid Purity, a More Sensitive Absorbance Peak, and Bromide Enhancement

Robert E. Bowman and Richard C. Wolf

A Rapid and Specific Ultramicro Method for Total Serum Cholesterol

Robert E. Bowman and Richard C. Wolf

Human Bile Proteins: 1. Proteins identified by antibody to human serum

Arnold J. Rawson

Beta Radiation Self Absorption of Precipitates Collected on Filter Paper: Studies with 53m-barium sulfate

Raymond G. Gottschalk, Hans Hoch, and George H. Stidworthy

Use of The Sanz Pipet in the Clinical Laboratory

Leola Westover, Maxine Wertman, and Arnold G. Ware

Scientific Note

335

Letter to the Editor

336

The Clinical Chemist

338
AUGUST

Serum Glutamic-Oxaloacetic Transaminase Activity: A new modification and an analytical assessment of current assay technics

Elias Amador and Warren E. C. Wacker 343

Gas Chromatographic Separations of Drugs and Drug Metabolites

W. J. A. VandenHeuvel, E. O. A. Hahti, and E. C. Hornig 351

A Micromethod for the Determination of Serum Iron and Serum Iron-Binding Capacity

Robert W. Scarlata and Edward W. Moore 360

Determination of Urine Dopamine

Fritz Bischoff and Adolfo Torres 370

Interferences in the Colorimetric Determination of Glucuronic Acid in Blood

Robert E. Mosher 378

A Routine Method for the Estimation of Serum Protein-bound Iodine

R. Bird and Dorothy J. Jackson 389

The Ultramicro Determination of Salicylates in Biologic Fluids

Albert Hanok 400

The Clinical Chemist 405

Program: 14th Annual Meeting of the AACC, Aug. 27-30, 1962 418

Book Reviews 454

OCTOBER

A Convenient Apparatus for Vertical Gel Electrophoresis

Samuel Raymond 455

Gel Electrophoresis

Samuel Raymond and Masumi Nakamichi 471

A Study of the Thymol Turbidity Test with Special Reference to Buffer Behavior:

Formulation of a modified reagent using tris-hydroxymethylaminomethane

John G. Reinhold 475

Dehydrogenase of Regenerating Red Blood Cells in Phenylhydrazine Anemia

Max M. Friedman, Bernard S. Kahn, and Bernard Lapin 486

Electrometric Titration of Copper and Zinc in Biologic Material

Nathaniel C. Johnson 497

Study of a Differential Demasking Technic for Serum Zine

Louis A. Williams, Jerry S. Cohen, and Bennie Zak 502

Serum Lipase Determination with an Olive Oil Substrate Using a Three-Hour Incubation Period

Roderick P. MacDonald and Royal O. LeFave 509

Incorporation of Sulfur Amino Acids by Lymphocytes during Wound Healing

Martin B. Williamson, Mary V. Whalen, and Harold B. Haley 520

Estimation of Serum Albumin: A Comparison of Three Methods

J. W. Keyser and B. T. Stephens 526

Logarithmic Recording Spectrophotometer for Densitometry and Flow Spectrophotometry

Bennie Zak, Jack Holland, and Louis A. Williams 530

A Punched-Card System for the Laboratory

Nathan Radin 538

Letters to the Editor 546

Book Reviews 548

The Clinical Chemist 549

DECEMBER

Ames Award Lecture 1962: Vitamin Imbalance in Metabolic Disease

Harry Sobotka 561

A New Diazo Method for the Determination of Bilirubin

Royden N. Rand and Alfred di Pasqua 570
Serum Factors Causing Abnormal Retardation of the Microelectrophoretic Mobility of the Red Blood Cell During Disease

Antonio Rottino and John Angers 579

Use of Tris(Hydroxymethyl) Aminomethane Buffer in Moving-boundary Electrophoresis of Serum

Julius Sendroy, Jr., F. Lee Rodkey, and Maxime MacKenzie 585

Changes in Ammonia Values of Protein-free Filtrates of Blood During Storage in the Frozen State

Charles E. Wilder 593

Microdetermination of Cholesterol and Phospholipid in Cerebrospinal Fluid and Serum by Silicic Acid Column Chromatography

Yung S. Shin and James C. Lee 598

Specific Enzymatic Determination of Glucose in Blood Serum or Plasma by an Automatic Potentiometric Reaction-Rate Method

H. V. Malmstadt and H. L. Pardue 606

Estimation of Low-Density Lipoprotein Immunoprecipitates in Uniform Drops of Serum

R. L. Searcy, T. M. Asher, and L. M. Bergquist 616

Variations in Levels of Transaminases and Lactic Dehydrogenase in Bank Blood

Leonard V. Crowley 626

X-Ray Spectrometry in the Clinical Laboratory: VII. Bromide normally present in human serum

Samuel Natelson, Bertram Sheid, and Donald R. Leighton 630

Serum Protein Determination by Automatic Recording Refractometry

W. H. Marsh and B. Fingerhut 640

Determination of Organic Iodine Compounds in Serum: II. Chromatographic studies of exogenous organic iodine compounds affecting the PBI and BEI

Vincent J. Pileggi, Richard J. Henry, Milton Segalove, and George C. Hamill 647

Blood Oxygen Determination by Gas Chromatography

K. Wayne Chambliss and Don C. Nourse 654

Oxidation of Homogentisic Acid by Nitrous Acid and its Interference in the Determination of 5-Hydroxyindoleacetic Acid

Richard B. Davis 660

The Time-Skill-Frequency (TSF) Unit for Reporting Laboratory Work-Load

Adrian Hainline, Jr. 665

The Clinical Chemist
